

1 Corporate information

The Consolidated Financial Statements of National Express Group PLC and its subsidiaries (the Group) for the year ended 31 December 2020 were authorised for issue in accordance with a resolution of the Directors on 18 March 2021. National Express Group PLC is a public limited company incorporated in England and Wales whose shares are publicly traded on the London Stock Exchange.

The principal activities of the Group are described in the Strategic Report that accompanies these Financial Statements.

2 Accounting policies

Basis of preparation

These Financial Statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations of the International Financial Reporting Interpretations Committee (IFRIC) as adopted by the United Kingdom (UK), and with those parts of the Companies Act 2006 applicable to companies reporting under IFRS.

These Financial Statements are presented in pounds Sterling and all values are rounded to the nearest one hundred thousand pounds (£0.1m) except where otherwise indicated.

Going concern

These Financial Statements have been prepared on the going concern basis (see Group Finance Director's Review on page 27) under the historical cost convention, except for the recognition of derivative financial instruments, financial assets at fair value through other comprehensive income and contingent consideration.

In adopting the going concern basis, the Directors have considered the Group's

- business activities;
- principal risks and uncertainties as set out on pages 36 to 41;
- exposure to the range of potential impacts of Covid-19 and also the depth and length of support provided by customers and governments; and,
- financial position, liquidity position and borrowing facilities as set out in the Group Finance Director's report within these Financial Statements.

The Group entered the Covid-19 pandemic in a strong liquidity position and this was further strengthened with an additional £190 million of bank loans and £230 million proceeds from the share placing in May 2020, and then a further £500 million (gross of fees) from the issuance of a hybrid instrument in November 2020. As at 31 December 2020, and also as of the date of publishing these Financial Statements, the Group had a total of £2.8 billion of debt capital, committed facilities and Bank of England Covid Corporate Finance Facility (CCFF), as set out in the Group Finance Director's report. At 31 December 2020 the Group had £1.9 billion in cash, undrawn committed facilities and CCFF available to it. For the purposes of the going concern assessment the Directors have excluded the £600 million CCFF when determining liquidity headroom and, whilst the Group can draw upon it up until 21 March 2021 for 12 months, the Directors are currently intending to allow it to lapse. The Directors have also not assumed any renewal or replacement of the £357 million of borrowing facilities that are currently scheduled to mature between now and the end of March 2022; any renewal or replacement of these, as well as any amounts issued under the £600 million CCFF programme, would provide further upside to the liquidity headroom in the Group's going concern assessment.

The Group has positive relationships and regular dialogue with its lenders. As set out on page 26, certain of the Group's borrowings are subject to covenant tests on gearing and interest cover on a bi-annual basis. For the 30 June and 31 December 2021 test dates, the gearing covenant has been waived by the lenders and the interest cover covenant has been amended to a minimum of 1.5x and 2.5x at 30 June and 31 December 2021 respectively. In return for these waivers and amendments to the covenants the Group has agreed to a quarterly £250 million minimum liquidity test (up to and including Q1 2022), a £1.6 billion maximum net debt test as at 30 June and 31 December 2021 and a restriction on dividend payment until normal covenant arrangements are back in place. All covenants are assessed on a pre-IFRS 16 basis.

The Directors continue to have a high degree of confidence in the long-term prospects. The Group has been winning contracts over recent months, with a strong pipeline of further opportunities. Whilst the pandemic has had a profound and rapid impact on travel patterns, with a shift away from public transport, this is not, in our view, sustainable as economies recover. Infrastructure constraints have not disappeared and climate change is rising in the public conscience and on government agendas. Clean, safe and efficient public transport is a clear solution, and this provides a strong backdrop for long-term growth for the Group.

2 Accounting policies continued

Notwithstanding the positive long-term outlook, the pandemic has clearly had an unprecedented impact on the Group and on the transport sector in general, and there is uncertainty over the pace of recovery in revenue over the short-term. In every country in which the Group principally operates, nationwide lockdowns of varying lengths were imposed from March 2020 and this resulted in the Group's revenue reducing by more than 50% year-on-year during the months of April and May 2020. As lockdown restrictions eased during the summer of 2020 we saw a steady improvement in activity levels, passenger numbers and revenue; Group revenue steadily recovered to around 30% down year-on-year by September. However, in response to second waves of Covid-19 governments re-imposed lockdowns and mobility restrictions. The UK Government announced in late October 2020 that the virus was spreading through England at a faster rate than their worst case scenario; a situation that was echoed elsewhere in the main countries in which the Group operates. The re-imposition of lockdowns and restrictions have not had as severe an impact on the Group's revenue as the initial lockdowns in Q2, but they have slowed down the pace of recovery. The second half of 2020 has turned out to be very close, in terms of both our assumptions on the external environment and our projections of the Group's financial results, to the reasonable worst case we set out at the time of publishing the half year Financial Statements in August. By December 2020 the Group's revenue remained circa 30% down year on year. The positive developments on vaccines, along with increased scale (relative to the initial outset of the pandemic) of governments' test and trace capabilities and wider abilities to contain the virus, bode well for the medium term recovery.

Our observations of, and responses to, the impact of the pandemic over recent months, along with our latest expectations of its continued impact over the going concern assessment period, have been carefully considered in arriving at an updated base case and reasonable worst case. We have then corroborated our own assumptions with external references, such as the predictions published by the IMF and OECD. The Directors have reviewed the base case and reasonable worst case projections, along with reverse stress tests. These scenarios and stress tests were used to evaluate liquidity headroom and compliance with revised covenants.

The key assumptions in the base case scenario are as follows:

- In the first half of 2021, a continuation of the circumstances observed in late 2020 and in early 2021: lockdowns and mobility restrictions with reduced commuting and consumer reticence for discretionary travel, along with continued social distancing mandated on UK public transport.
- In the second half of 2021 vaccines start to make a material impact on infection rates in the countries in which the Group principally operates, with a consequent lifting of mobility restrictions allowing a steady recovery in revenue such that by December 2021 group revenue recovers to close to what it was in December 2019 (although on a like-for-like basis, i.e. excluding new business or contracts, would remain below 2019).
- In Q1 2022 Group revenue is assumed to have recovered to be higher than it was in Q1 2019, albeit still below on a like-for-like basis.
- In the UK, a national lockdown is assumed for the first quarter of 2021, with the coach network fully shut down during that period.
- In North America school bus c.40% of schools remain closed for the entirety of the first half; an increased proportion of closures compared to Q4 2020. Closed schools continue to pay contribution towards costs, in order for us to minimise the number of employees that we lay off, at broadly the same levels as in Q4 2020. All schools assumed to be open after the summer break.
- Government support continues to be available as follows:
 - Job retention schemes in UK until end of April 2021, utilised in coach but not in bus.
 - Job retention scheme available in Spain at the enhanced level until May 2021 and then at pre-pandemic levels of support thereafter for the remainder of the assessment period.
 - US government funding available during H1 2021 at similar levels to 2020 to contribute to benefits for employees temporarily laid-off.
 - The Covid-19 Bus Services Support Grant ("CBSSG") continues to operate in the UK for the first part of the year, after which it is assumed to be replaced by a support scheme to pay for bus operators to maintain certain service levels until passenger levels return to close to pre-pandemic levels.
 - Covid-19 compensation provided by authorities in Germany and Spain on the same basis as provided in 2020; principally in H1.
- Substantial cost saving initiatives including group-wide reductions in administrative and managerial headcount. The majority of these cost saving initiatives have already been implemented or are already in progress.
- A partial unwind (cash inflow) of the negative working capital movement incurred in 2020; reflecting an increase in passenger revenue (and a reduction in subsidies, compensation or grants paid in arrears), along with an increase in payables as activity levels increase.

The key assumptions in the reasonable worst case scenario are as follows:

- Covid-19 vaccines are ineffective or are delayed, such that they do not have any impact on infection rates until late in the year.
- Lockdowns and severe mobility restrictions apply across the majority of the year and, accordingly, Group revenue for 2021 does not improve from 2020, and is therefore 25%-30% down on 2019 (even greater on a like-for-like basis), followed by a much slower recovery in Q1 2022 than assumed in the base case.
- 20% of schools remain closed in North America after the summer break.
- The UK Coach network is closed for the majority of the first half.
- Materially lower levels of government support available across the Group, including no revenue support from 1st July 2021. This is partially mitigated by reducing service levels in order to reduce costs.
- No partial unwind of the negative working capital movement incurred in 2020; reflecting continued lower levels of payables combined with delays in collection of receivables.

2 Accounting policies continued

Against this reasonable worst case the Group has applied mitigations in the form of further reductions in expenditure, over and above those reflected in the base case. The majority of these further cost savings have already been identified and can be swiftly implemented should the reasonable worst case scenario occur. Whilst the cost savings in the base case and reasonable worst case would involve restructuring activity, they do not involve significant structural changes to the Group.

In the base case and reasonable worst case scenarios the Group has a strong liquidity position over the next 12 months. The monthly cash consumption in the reasonable worst case is projected to average c.£40 million at the peak adverse point; this compares with £1.9 billion of liquidity as at 31 December 2020, or £1.3 billion excluding the £600 million CCFF. In the base case and reasonable worst case scenarios the Group also has headroom on all of its revised covenant tests.

In addition to the base case and reasonable worst case scenarios, the Directors have reviewed reverse stress tests, in which the Group has assessed the set of circumstances that would be necessary for the Group to either breach the limits of its borrowing facilities or breach any of the covenant tests.

In applying a reverse stress test to liquidity the Directors have concluded that the set of circumstances required to exhaust it are so extreme as to be considered clearly remote.

Covenants that include EBITDA as a component are more sensitive to reverse stress testing, because of the material impact that events or actions outside of the control of the Group, such as government-imposed lockdowns or withdrawal of government or customer support, can have on short-term revenue. The Directors have therefore conducted in-depth stress testing on the interest cover covenant, being the only covenant test during the going concern period that contains an EBITDA component. In doing so, a key assumption is the consideration and application of all cost mitigations that would be within the Group's control, and indeed that the Directors would have no alternative but to pursue, if faced with a short-term material EBITDA reduction and no lender support to amend or waive EBITDA-related covenants; this is a key assumption. Taking this into account the Directors concluded that the circumstances that would be necessary for covenants to be breached were remote.

In any case, should there be a more severe set of circumstances than those assumed in the reasonable worst case, the Group could also have a number of further mitigations available to it including: deeper and broader cost cutting measures, seeking further amendments or waivers of covenants, the renewal or replacement of borrowing facilities maturing in the next 12 months, raising further equity, sale and leaseback of vehicles, disposal of properties and disposal of investments or other assets.

In conclusion, the Directors have a reasonable expectation that the Group as a whole has adequate resources to continue in operational existence for a period of 12 months from the date of approval of the Financial Statements. For this reason, they continue to adopt the going concern basis in preparing the Financial Statements for the year ended 31 December 2020.

Changes in accounting policies and the adoption of new and revised standards

The accounting policies adopted are consistent with those of the previous financial year except for changes arising from new standards and amendments to existing standards that have been adopted in the current year.

Inter-Bank Offered Rate ("IBOR") Reform – Phase 1 (amendments to IFRS 9, IAS 39 and IFRS 7) were issued in September 2019 and were applied for the first time with effect from 1 January 2020. The Group does not hold any derivative financial instruments linked to IBOR rates such as LIBOR and EURIBOR that expire beyond 31 December 2021, therefore no existing hedge relationships have been affected as a result of adopting this amendment.

The Group has also early adopted Covid-19-Related Rent Concessions – Amendment to IFRS 16 issued on 28 May 2020. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. The amendment gives lessees the option not to assess whether a Covid related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification. The Group has applied the amendment retrospectively. The amendment has no impact on retained earnings at 1 January 2020.

The following other amendments and interpretations have been applied for the first time with effect from 1 January 2020:

- Definition of Material – amendments to IAS 1 and IAS 8
- Definition of a Business – amendments to IFRS 3
- Revised Conceptual Framework for Financial Reporting

These amendments did not have any impact on the amounts recognised in prior periods and are not expected to significantly affect the current or future periods.

The Group makes certain adjustments to the statutory profit measures in order to derive many of its alternative performance measures (APMs). The Group's policy is to exclude items that are considered significant in nature and/or value, not in the normal course of business or are consistent with items that were treated as separately disclosed in prior periods. The Group's policy remains unchanged from prior periods, however has been clarified to confirm how these adjustments are identified. The Board believes that making these adjustments to profit gives a more comparable year-on-year indication of the operating performance of the Group and allows the users of the Financial Statements to understand management's key performance measures. These measures are consistent with how business performance is measured internally by the Board and Executive Committee. For additional information about the Group's accounting policy relating to separately disclosed items, see page 154.

2 Accounting policies continued

Prior year representation

In September 2019 the Group entered into a service concession arrangement with a Moroccan transport authority for the operation of public transport bus services. The infrastructure used in the agreement comprised public service vehicles. During December 2019, the Group acquired a number of vehicles, totalling £17.5m, subject to a lease arrangement. The right-of-use asset was correctly presented within infrastructure intangibles. However the liability for these leases was recorded in lease liabilities within borrowings, whereas in accordance with IFRIC 12 should have been recorded as a financial liability within contract liabilities.

This has been corrected by representing each of the financial statement line items for the prior period as follows:

	31 December 2019 (Reported) £m	31 December 2019 (Represented) £m
Trade and other payables (current)	(1,052.9)	(1,056.5)
Trade and other payables (non-current)	(164.3)	(178.2)
Borrowings (current)	(652.8)	(649.2)
Borrowings (non-current)	(1,104.9)	(1,091.0)
Total liabilities	(3,295.8)	(3,295.8)
Net debt	(1,241.5)	(1,224.0)

As this was a Balance Sheet reclassification there is no impact to operating profit, earnings per share or any other primary statements.

Critical accounting judgements and key sources of estimation uncertainty

The preparation of Financial Statements requires the Group to make estimates and judgements that affect the application of the Group's accounting policies and reported amounts.

Critical accounting judgements represent key decisions made by management in the application of the Group accounting policies. Where a significant risk of materially different outcomes exists due to management assumptions or sources of estimation uncertainty, this will represent a key source of estimation uncertainty. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

Management considered, throughout the year, the financial reporting impact associated with our identified principal risks which include the effects of COVID-19, climate change, and Brexit.

(i) Critical accounting judgements

Separately disclosed items

The Directors believe that the profit and earnings per share measures before separately disclosed items provide additional useful information to shareholders on the performance of the Group. These measures are consistent with how business performance is measured internally by the Board and the Group Executive Committee. The classification of separately disclosed items requires significant management judgement after considering the nature, cause of occurrence and the scale of the impact of that item on reported performance. The Group's definition of separately disclosed items is outlined on page 154. These definitions have been applied consistently year-on-year, with additional items due to, and certain directly attributable expenses resulting from the Covid-19 pandemic. Specifically, judgement has been required to identify incremental costs associated with the pandemic that are not expected to arise in future periods and do not form part of the underlying operating activities of the Group.

Note 5 provides further details on current year separately disclosed items.

Going concern

In concluding that the going concern assessment without material uncertainties was appropriate the Directors have made a number of significant judgements as detailed on pages 149 to 151.

(ii) Key sources of estimation uncertainty

Impairment of property, plant and equipment and intangibles

Determining whether assets are impaired requires an estimation of the value in use of the cash-generating units and requires the entity to estimate the future cash flows expected to arise, the growth rate to extrapolate cash flows into perpetuity and a suitable discount rate in order to calculate present value. Cash flow projections involve the use of estimates, notably revenue levels, operating margins and the proportion of operating profit converted to cash in each year. Given the level of headroom in ALSA and the volatility of inputs to the discount rate (particularly the beta and equity risk premiums including country-specific risk premiums), long term growth rates and short

term cash flow projections, we consider impairment to be a new key source of estimation uncertainty with respect to our ALSA division. The key assumptions used and their sensitivities are included in note 14.

2 Accounting policies continued

Insurance and other claims

The claims provision arises from estimated exposures at the year end for auto and general liability, workers' compensation and environmental claims, the majority of which will be utilised in the next five years. The estimation of the claims provision is based on an assessment of the expected settlement of known claims together with an estimate of settlements that will be made in respect of incidents occurring prior to the balance sheet date but for which claims have not been reported to the Group. The Group makes assumptions concerning these judgemental matters with the assistance of advice from independent qualified actuaries. At the 31 December 2020 the claims provision was £80.7m (2019: £93.7m).

In certain rare cases, additional disclosure regarding these claims may seriously prejudice the Group's position and consequently this disclosure is not provided. Given the differing types of claims, their size, the range of possible outcomes and the time involved in settling these claims, there is a reasonably possible chance that a material adjustment would be required to the carrying value of the claims provision in the next financial year. These different factors also make it impracticable to provide sensitivity analysis on one single measure and its potential impact on the overall claims provision. For further information see note 26.

Valuation of put liability

In conjunction with the acquisition of WeDriveU, Inc. during 2019 the Group issued put options to the seller to sell the remaining shares. The first tranche of put options, for 10% of the equity of WeDriveU, has been exercised at 31 December 2020 and will be settled in 2021. There are put options over the remaining 30% of equity exercisable in two tranches from 2021 to 2022, and each tranche can be rolled over if not exercised, up to 31 December 2022 at the latest. At the 31 December 2020 the put liability was £63.0m (2019: £96.8m). The put liability valuation is sensitive to EBITDA forecasts, particularly given the disruption due to the pandemic, discount rates and the expected timing of exercise. Changes in these estimates could significantly impact the liability and details of the assumptions are set out in note 25, to these Financial Statements, along with their sensitivities.

Onerous contract provisions

Onerous contract provisions arise where the unavoidable costs of meeting the obligations under the applicable contracts exceed the economic benefits expected to be received. At the 31 December 2020 onerous contract provisions totalled £38.0m (2019: £nil). The estimation of the provisions involves the use of forecast information, which includes inputs such as passenger revenues and the level of fixed and variable costs. The key area of estimation uncertainty is in respect to the forecast of passenger revenues, in particular the extent to which the pandemic has a lasting effect on passenger revenue. Consequently this is considered to be a new significant estimate in 2020. Sensitivity analysis with respect to changes in passenger revenues is provided in note 26.

Pensions

The determination of the defined benefit obligation of the UK defined benefit pension scheme depends on the selection of certain assumptions which include the discount rate, inflation rate and mortality rates. At the 31 December 2020 the UK defined benefit pension liability was £141.6m (2019: £99.1m). The key area of estimation uncertainty is in respect to the discount rate, and in particular the volatility of corporate bond yields in response to the pandemic. Whilst the Board believes that the assumptions are appropriate, significant differences in actual experience or significant changes in assumptions may significantly change the pension obligation. The Group makes assumptions concerning the assumptions with the assistance of advice from independent qualified actuaries. Details of the assumptions are set out in note 34, to these Financial Statements, along with their sensitivities.

Basis of consolidation

These Consolidated Financial Statements comprise the Financial Statements of National Express Group PLC and all its subsidiaries drawn up to 31 December each year. Adjustments are made to bring any dissimilar accounting policies that may exist into line with the Group's accounting policies.

The Consolidated Income Statement includes the results of subsidiaries and businesses purchased from the date control is assumed and excludes the results of disposed operations and businesses sold from the date of disposal.

Intra-group transactions, balances and unrealised gains and losses on transactions between Group companies are eliminated.

Non-controlling interests represent the portion of comprehensive income and equity in subsidiaries that is not attributable to the parent Company shareholders and is presented separately from parent shareholders' equity in the Consolidated Balance Sheet.

Summary of significant accounting policies

Subsidiaries

Subsidiaries are entities over which the Company has control. Control exists when the Company has power over an entity, exposure to variable returns from its involvement with an entity and the ability to use its power over the entity to affect its returns. The existence and effect of potential voting rights that are currently exercisable or convertible are also considered when assessing control.

2 Accounting policies continued

Interests in joint ventures

The Group has a contractual arrangement to share control of an entity. The Group recognises its interest in the assets and liabilities of the entity using the equity method of accounting. The Group Balance Sheet includes the appropriate share of the joint ventures net assets or liabilities and the Income Statement includes the appropriate share of their results after tax.

Financial Statements of joint ventures are prepared for the same reporting period as the Group. Adjustments are made in the Group's Financial Statements to eliminate the Group's share of unrealised gains and losses on transactions between the Group and its joint venture. The Group ceases to use the equity method from the date it no longer has joint control over the entity.

Interests in associates

Companies, other than subsidiaries and joint ventures, in which the Group has an investment representing not less than 20% of the voting rights and over which it exerts significant influence are treated as associates. The Consolidated Financial Statements include the appropriate share of these associates' results and net assets based on their latest Financial Statements under the equity method of accounting.

Foreign currencies

The trading results of foreign currency denominated subsidiaries, joint ventures and associates are translated into Sterling, the presentation currency of the Group and functional currency of the parent, using average rates of exchange for the year as a reasonable approximation to actual exchange rates at the dates of transactions.

The balance sheets of foreign currency denominated subsidiaries, joint ventures and associates are translated into Sterling at the rates of exchange prevailing at the year end and exchange differences arising are taken directly to the translation reserve in equity. On disposal of a foreign currency denominated subsidiary, the deferred cumulative amount recognised in the translation reserve (since 1 January 2004 under the transitional rules of IFRS 1) relating to that entity is recognised in the Income Statement. All other translation differences are taken to the Income Statement, with the exception of differences on foreign currency borrowings and forward foreign currency contracts which are used to provide a hedge against the Group net investments in foreign enterprises. These are taken directly to equity until the disposal of the net investment, at which time they are recognised in the Income Statement.

Presentation of Income Statement and separately disclosed items

The Group Income Statement has been presented in a columnar format to enable users of the Financial Statements to view the underlying results of the Group. The Group's policy is to exclude items that are considered significant in nature and/or value, not in the normal course of business or are consistent with items that were treated as separately disclosed in prior periods. Treatment as a separately disclosed item provides users of the accounts with additional useful information to assess the year-on-year trading performance of the Group. Further details relating to separately disclosed items are provided in note 5 and a full listing of the Group's alternative performance measures (APMs) are provided in the glossary on page 243.

Revenue recognition

Revenue is measured based on the consideration specified in the contract with a customer and is recognised when the performance obligations of the contract have been fulfilled.

Contract revenues

For the purposes of disclosures, the Group has applied the term 'contract revenues' to describe documented contracts that typically cover periods of at least one year, excluding concessions and subsidies. The contracts primarily relate to home to school and transit contracts in North America, urban bus contracts in Spain and coach contracts in the UK.

Revenues relating to the provision of transport services are recognised as the services are provided and in accordance with the terms of the contract. Revenue relating to any additional performance measures in the contract are recognised when the performance has been met and in accordance with the terms of the contract.

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring services to the customer. The variable consideration is estimated at contract inception and constrained until the associated uncertainty is resolved and when it becomes highly probable that a significant revenue reversal will not occur.

Passenger revenues

Passenger revenues primarily relate to ticket sales in the UK, German Rail, intercity coach services in Spain and urban bus services in Morocco.

2 Accounting policies continued

Revenue is recognised by reference to the date of customer travel. Revenue from tickets that cover more than one day, for example monthly travelcards and season tickets, is initially deferred as a liability and released to the Income Statement over the period of the ticket.

Deferred income liability is reduced when an eligible cancellation arises. Also, where applicable, deferred income is reduced for ticket breakage, being the portion of future travel that is not expected to be exercised.

Booking fees are non-refundable and recognised at the point of sale, reflecting fulfilment of the performance obligation. Other ancillary revenues relating to ticket sales are recognised at point of sale or, if material and related to a future performance period, recognised by reference to that period.

Loyalty points issued to customers are recorded and valued by management. Where material, the cumulative redeemable value of the points is deducted from the related revenue and deferred as a liability until the points are redeemed.

Passenger revenue in German Rail is allocated between the various transport providers in each region by the tariff authority responsible for that region, and is recognised based on passenger counts, tariff authority estimates and historical trends.

Grants and subsidies

Grants and subsidies relating to the provision of transport services are recognised as the services are provided and in accordance with the terms of the contract.

In the current year, revenue in relation to the Covid-19 Bus Services Support Grant (CBSSG) has been recognised within grant and subsidy revenue in the UK and is recognised in the period in which the operational revenue and costs it is supporting relates to. CBSSG requires that a minimum level of service is operated, revenue is variable and includes areas of estimation when determining the transaction price with the actual revenue not confirmed until the review process is complete. The Group has recognised revenue where the amount can be measured reliably and it is highly probable that a significant reversal in the amount of cumulative revenue will not occur. Similarly, revenue related grants in ALSA and Germany have been recognised in the current year to compensate for the loss of passenger revenue due to pandemic. See note 4 for further details.

Private hire

Private hire operations are contracts provided in the UK, ALSA and North America divisions and are typically of a short duration. Revenue is recognised over the period in which the private hire is provided to the customer.

Other revenues

Other revenues primarily comprise non-passenger services in Spain, transit software income in North America and advertising revenues.

Revenues for non-passenger services are recognised when the performance of the service has been fulfilled and in accordance with the terms of the contract. Transit software income is recognised when the benefit of the software or service has been passed to the customer. Advertising revenue is recognised over the period of the advertising contract.

Contract costs

Costs to obtain a contract

The incremental costs to obtain a contract with a customer are recognised within 'contract costs' if it is expected that those costs will be recoverable. Costs to obtain a contract that would have been incurred regardless of whether the contract was obtained are recognised as an expense in the period.

Costs to fulfil a contract

Costs that relate directly to a contract, generate resources that will be used in satisfying the contract and are expected to be recovered are recognised within 'contract costs' on the Balance Sheet. Contract fulfilment costs covered within the scope of another accounting standard, such as property, plant and equipment and intangible assets, are not capitalised as contract fulfilment assets but are treated according to those standards.

Contract costs are amortised on a straight-line basis over the term of the specific contract they relate to, consistent with the pattern of recognition of the associated revenue.

Contract assets and liabilities

Contract assets are recognised where the Group has performed its obligations to allow the recognition of revenue, however the amounts have not yet been invoiced to the customer.

Contract liabilities are recognised when amounts are advanced by customers, however the Group has not yet met the performance obligation to allow the recognition of the balance as revenue.

2 Accounting policies continued

Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and that the Group will comply with the conditions attached to it. When the grant relates to an expense item, it is recognised in operating costs within the Income Statement over the period necessary to match on a systematic basis to the costs that it is intended to compensate. Revenue related grants are recognised in grant and subsidy revenue in the period in which the operational revenue it is supporting relates to. Where the grant relates to property, plant and equipment, the value is included in liabilities as deferred income and credited to the Income Statement over the expected useful economic life of the assets concerned.

Government grants received in excess of the amounts recognised in the Income Statement are held as deferred grant income within trade and other payables, whereas, government grants recognised in the Income Statement that are yet to be received are held as grant receivables in trade and other receivables.

Service concession arrangements

In Germany, Spain and Morocco, the Group provides services through public-private partnerships with public authorities responsible for the provision of public transport services.

Concession arrangements involve the transfer of operating rights for a limited period, under the control of the local authority, using dedicated facilities supplied by the Group, or made available to it for or without consideration.

The characteristics of these contracts vary depending on the country and activities concerned.

Financial asset model

The Group applies the financial asset model when the concession grantor contractually guarantees the payment of amounts specified in the contract or the shortfall, if any, between amounts received from users of the public service and amounts specified.

Financial assets resulting from the application of IFRIC 12 'Service Concession Arrangements' are recorded in the Group Balance Sheet as financial assets or liabilities within working capital. These financial assets are assessed for impairment in line with the provisions of IFRS 9.

Income received from the public authorities is recognised in line with the requirements of IFRS 15. In Germany, subsidy income from the Public Transport Authority (PTA) is recognised over the life of the franchise and by using the input method to measure progress against the performance obligation. The amount recognised in each period is based on a percentage of completion, applying net costs incurred as a proportion of total expected net costs, which is what the subsidy is intended to compensate. In accordance with IFRS 15, costs payable to the PTA are netted against subsidy income. In ALSA, subsidy income from the local authority is recognised as the services are provided and in accordance with the terms of the contract.

Intangible asset model

The Group applies the intangible asset model when income is directly received from the passengers and there is no contractual guarantee from the concession grantor. The intangible asset corresponds to the right granted by the public authority to the Group to charge passengers of the public service.

Intangible assets resulting from the application of IFRIC 12 are recorded in the Group Balance Sheet and are amortised on the basis of the expected pattern of consumption applicable over the term of the concession.

Income received from passengers is recognised in line with the requirements of IFRS 15 and the policy detailed on page 154.

Infrastructure assets which are subject to a lease arrangement are recorded in accordance with IFRIC 12. The liability is recorded at the present value of the future payments within financial liabilities. The asset is recorded according to the underlying classification of the IFRIC 12 contract (as set out above).

Taxes

Current tax

Current tax is provided on taxable profits earned according to the local tax rates applicable where the profits are earned. Income taxes are recognised in the Income Statement unless they relate to an item accounted for in Other Comprehensive Income or Equity, in which case the tax is recognised directly in Other Comprehensive Income or Equity. The tax rates and tax laws used to compute the current tax are those that are enacted or substantively enacted at the Balance Sheet date.

2 Accounting policies continued

Deferred tax

Deferred tax is provided in full in respect of all material temporary differences at the balance sheet date between the tax base and their carrying amounts for financial reporting purposes, apart from the following exceptions:

- where the temporary difference arises from the initial recognition of goodwill;
- where an asset or liability is recognised in a transaction that is not a business combination and that at the time of the transaction affects neither accounting nor taxable profit or loss; and
- in respect of investment in subsidiaries, associates and joint ventures where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is measured on a non-discounted basis at tax rates that are expected to apply in the periods in which the temporary differences reverse based on tax rates and laws enacted or substantively enacted at the balance sheet date.

Deferred tax assets are recognised to the extent that it is considered more likely than not that future taxable profits will be available against which the underlying temporary differences can be deducted. For this purpose, forecasts of future taxable profits are considered by assessing the Group's forecast revenue and profit models, taking into account future growth predictions and operating cost assumptions, as well as assumptions on the tax elections within the Group's control.

Accordingly, changes in assumptions to the Group's forecasts may have an impact on the amount of future taxable profits and therefore the period over which any deferred tax assets might be recovered.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and when the Group intends to settle its current tax assets and liabilities on a net basis.

Business combinations

On the acquisition of a business, identifiable assets and liabilities acquired are measured at their fair value. Contingent liabilities assumed are measured at fair value unless this cannot be measured reliably, in which case they are not recognised but are disclosed in the same manner as other contingent liabilities.

The cost of acquisition is measured at the aggregate of the fair values, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued. Any contingent consideration is recognised at fair value at the acquisition date and subsequently until it is settled.

The cost of the acquisition in excess of the Group's interest in the net fair value of the identifiable net assets acquired is recorded as goodwill. If the cost of the acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the Income Statement.

Non-current assets held for sale and discontinued operations

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction rather than continuing use. This condition is regarded as met only when the sale is highly probable, the asset (or disposal group) is available for immediate sale in its present condition, management is committed to the sale and when the sale is expected to complete within one year from the date of classification. Assets held for sale are stated at the lower of carrying amount and fair value less costs to sell.

A discontinued operation is a component of the Group that has been disposed of, or is classified as held for sale and either represents a separate major line of business or geographical area; is part of a plan to dispose of a separate major line of business or geographical area; or is a subsidiary acquired exclusively for resale.

Discontinued operations are excluded from the results of continuing operations and presented as a single amount after tax. Comparatives are also represented to reclassify the operation as discontinued.

Intangible assets

Goodwill

Goodwill arising on consolidation represents the excess of the cost of acquisition over the fair value of the Group's share of the identifiable assets and liabilities of the acquired subsidiary, associate or joint arrangement at the date of acquisition.

Following initial recognition, goodwill is measured at cost less any accumulated impairment losses and is not amortised.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. A cash-generating unit is identified at the lowest aggregation of assets that generate largely independent cash inflows, and which is reviewed by management for monitoring and managing the Group's business operations.

On disposal of a cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

2 Accounting policies continued

Other intangible assets

Customer contracts

Customer contracts acquired as part of a business combination are initially recorded at the fair value attributed to those contracts on acquisition.

Service concessions

Service concession intangible assets represent a right to charge passengers for the use of the public service. See page 156 for further details.

Contract costs

Contract costs include costs to obtain and costs to fulfil a contract. See page 155 for further details.

Software

Acquired and internally developed software is capitalised on the basis of the costs incurred to acquire and bring to use the specific software or fair value if acquired as part of a business combination. Computer software that is integral to a tangible fixed asset is recognised within property, plant and equipment.

Amortisation is charged on a straight-line basis over the expected useful lives of the assets as follows:

Customer contracts	– over the life of the contract (1 to 33 years)
Contract costs	– over the term of the specific contract (1 to 15 years)
Software	– over the estimated useful life (3 to 7 years)

The useful lives are examined on an annual basis and adjustments, where applicable, are made on a prospective basis. Intangible assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Property, plant and equipment

All property, plant and equipment is stated at historical cost less accumulated depreciation and accumulated impairment losses.

Repairs and maintenance costs are expensed as incurred.

Freehold land is not depreciated. All other property, plant and equipment is depreciated on a straight-line basis over their estimated useful lives as follow:

Land and buildings	– 15 to 50 years
Public service vehicles	– 8 to 20 years
Plant and equipment, fixtures and fittings	– 3 to 15 years

Useful lives and residual values are reviewed annually and adjustments, where applicable, are made on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset, with any gain or loss arising included in the Income Statement in the period of derecognition.

Impairment

Intangible assets with definite useful lives, and property, plant and equipment are tested for impairment when events or circumstances indicate that their carrying value may not be recoverable. Goodwill is subject to an impairment test on an annual basis or more frequently if there are indicators of impairment. Assets that do not generate independent cash flows are combined into cash-generating units.

The impairment testing of individual assets or cash-generating units requires an assessment of the recoverable amount of the asset or cash-generating unit. If the carrying value of the asset or cash-generating unit exceeds its estimated recoverable amount, the asset or cash-generating unit is written down to its recoverable amount. Recoverable amount is the greater of fair value less costs of disposal and value in use. Value in use is assessed based on estimated future cash flows discounted to their present value using a pre-tax discount rate that is based on the country-specific weighted average cost of capital (WACC). The outcome of such an assessment is subjective, and the result sensitive to the assumed future cash flows to be generated by the cash-generating units or assets, the growth rate used to extrapolate the cash flows beyond the three-year period and discount rates applied in calculating the value in use.

Impairment losses relating to goodwill cannot be subsequently reversed.

Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. The Group determines the classification of its financial instruments at initial recognition.

Financial assets

Financial assets are classified at initial recognition as (i) subsequently measured at amortised cost, (ii) fair value through other comprehensive income or (iii) fair value through profit and loss. The classification depends on the purpose for which the financial assets were acquired.

2 Accounting policies continued

Financial assets at fair value through profit and loss

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Financial assets at fair value through profit or loss are carried in the Group Balance Sheet at fair value with net changes in fair value recognised in the Income Statement within finance costs. Transaction costs arising on initial recognition are expensed in the Income Statement.

Financial assets at fair value through other comprehensive income

The Group has elected to recognise its non-listed equity investments at fair value through other comprehensive income. Gains and losses on these financial assets are never recycled to the Income Statement. Dividends are recognised as other income in the Income Statement when the right of payment has been established. Where there is no active market for the Group's investments, fair value is determined using valuation techniques including recent commercial transactions and discounted cash flow analyses. Equity instruments designated at fair value through other comprehensive income are not subject to impairment assessment.

Financial assets at amortised cost

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold assets to collect contractual cash flows, and its contractual terms give rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Group's financial assets at amortised cost include trade and other receivables and cash and cash equivalents in the Balance Sheet.

Financial liabilities

Financial liabilities are classified at initial recognition as (i) financial liabilities at fair value through profit or loss, (ii) loans and borrowings, (iii) payables or (iv) derivatives designated as hedging instruments, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments. Subsequent measurement depends on its classification as follows:

Financial liabilities at fair value through profit and loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method. Gains and losses are recognised in the Income Statement when the liabilities are derecognised. Amortisation is included as finance costs in the Income Statement. This category applies to interest-bearing loans and borrowings.

Equity instruments

Hybrid instruments

Hybrid instruments issued by the Group are classified on initial recognition according to the substance of the arrangement. Hybrid instruments are recorded within Equity where the contractual terms of the instruments allow the Group to defer coupon payments and the repayment of the principle amount indefinitely. These features give the Group the unconditional right to avoid the payment of cash or another financial asset for the principal or coupon and consequently are classified as equity instruments. These equity instruments are not re-measured from period to period. Coupon payments made are treated the same as an equity dividend distribution and where not made, are accrued within the hybrid reserve, with a corresponding reduction in retained earnings.

Derivative financial instruments and hedge accounting

The Group uses derivative financial instruments such as fuel derivatives, interest rate derivatives, foreign exchange forward contracts and cross currency interest rate swaps to hedge its risks associated with fuel price, interest rate fluctuations and foreign currency. Such derivative financial instruments are initially recognised at fair value and subsequently re-measured to fair value for the reported Balance Sheet. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. The fair value of the derivatives is calculated by reference to market exchange rates, interest rates and fuel prices at the period end.

The Group designates certain derivatives as either:

- hedges of the fair value of recognised assets or liabilities or a firm commitment (fair value hedges);
- hedges of a particular risk associated with the cash flows of recognised assets and liabilities and highly probable forecast transactions (cash flow hedges); or
- hedges of a net investment in a foreign operation (net investment hedges).

2 Accounting policies continued

At inception of designated hedging relationships, the Group documents the risk management objective and strategy for undertaking the hedge. The Group also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other.

The Group's interest rate derivatives are designated as either fair value hedges or cash flow hedges. For fair value hedges, the gain or loss on the hedging instrument is recognised immediately in the Income Statement. The carrying amount of the hedged item is adjusted through the Income Statement for the gain or loss on the hedged item attributable to the hedged risk, in this case movements in the risk-free interest rate.

The Group's fuel derivatives are designated as cash flow hedges. The gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in equity. The gains or losses deferred in equity in this way are recycled through the Income Statement in the same period in which the hedged underlying transaction or firm commitment is recognised in the Income Statement.

Foreign exchange forward contracts and cross currency interest rate swaps are used to hedge the Group's net investment in foreign currency denominated operations, and to the extent they are designated and effective as net investment hedges are matched in equity against foreign exchange exposure in the related assets and liabilities. Gains and losses accumulated in equity are included in the Income Statement when the foreign operation is partially disposed of or sold.

The Group also uses foreign exchange forward contracts to hedge certain transactional exposures. These contracts are not hedge accounted and all gains and losses are taken directly to the Income Statement.

For derivatives that do not qualify for hedge accounting, gains or losses are taken directly to the Income Statement in the period. Similarly, any material ineffective portion of the Group's cash flow and net investment hedges is recognised in the Income Statement.

Movements in the fair value of the hedging instrument arising from costs of hedging for cash flow and net investment hedges are recognised in equity, disclosed separately and amortised to the Income Statement over the term of the hedge relationship on a rational basis.

Any material ineffectiveness is recognised in the income statement within operating costs for fuel derivatives and finance costs for all other derivatives.

Hedge accounting is discontinued when the hedging instrument or hedged item expires, is sold, terminated, exercised, or no longer qualifies for hedge accounting. For fuel derivatives, this can arise due to a change in the highly probable forecast transaction as a result of a change in divisional volume requirements. In such instances, accumulated fair value gains or losses are transferred from Other Comprehensive Income to the Income Statement for affected trades when hedge accounting has been discontinued.

Inventories

Inventories are valued at the lower of cost and net realisable value on a first in-first out basis, after making due allowance for obsolete or slow moving items.

Trade and other receivables

Trade and other receivables are recognised and carried at the transaction price determined under IFRS 15, less provision for impairment.

The Group applies the IFRS 9 simplified approach to measuring expected credit losses, which uses a lifetime expected loss allowance for trade receivables. The Group uses provision matrices based on historical ageing of receivables and credit loss experience, adjusted as necessary for any forward-looking factors specific to the debtors and economic environment.

Trade receivables are derecognised where the Group enters into factoring arrangements without recourse and the risks and rewards have been fully transferred. The Group classifies the cash flows from receivable factoring arrangements within cash from operating activities in the Statement of Cash Flows.

Cash and cash equivalents

Cash and cash equivalents as defined for the Statement of Cash Flows comprise cash in hand, cash held at bank with immediate access, other short-term investments and bank deposits with maturities of three months or less from the date of inception, and bank overdrafts. In the Consolidated Balance Sheet, cash and cash equivalents are presented net of bank overdrafts where there is a legal right of offset, otherwise are included within borrowings in current liabilities.

Trade and other payables

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

The Group classifies the cash flows from advance factoring of divisional revenues within cash from operating activities in the Statement of Cash Flows.

2 Accounting policies continued

Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Provisions are measured at the Directors' best estimate of the expenditure required to settle the obligation at the balance sheet date, and are discounted to present value where the effect is material using a pre-tax discount rate. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liabilities are obligations that arise from past events that are dependent on future events. They are disclosed in the notes to the Financial Statements where the expected future outflow is not probable.

Onerous contracts

An onerous contract is a contract under which the unavoidable costs (i.e., the costs that the Group cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it. The cost of fulfilling a contract comprises the costs that relate directly to the contract (i.e., both incremental costs and an allocation of costs directly related to contract activities).

Where the Group assesses a contract is onerous, the present obligation under the contract is recognised and measured as a provision. However, before a separate provision for an onerous contract is established, the Group recognises any impairment loss on assets dedicated to that contract.

Insurance

The Group's policy is to not insure low value, high frequency claims within the businesses. To provide protection against higher value claims the Group purchases insurance cover from a selection of proven and financially strong insurers. Liabilities in respect of claims risk include projected settlements for known and incurred but not reported claims. Projected settlements are estimated based on historical trends and actuarial data and are discounted to take account of the expected timing of future cash settlements. To the extent insurance liabilities are insured and awaiting settlement, a separate asset is recognised in other receivables.

Leases

Group as a lessee

Lease identification

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identifiable asset for a period of time in exchange for consideration. Non-lease components, and contracts which do not contain a lease are expensed in the Income statement on a systematic basis over the contract term.

Right-of-use asset

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset and the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

Lease liability

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

The lease liability is measured at amortised cost using the effective interest method. It is re-measured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

2 Accounting policies continued

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the low-value assets recognition exemption to leases of assets below £5,000. Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Covid-19-related rent concessions

The Group applies the option to not assess whether eligible rent concessions that are a direct consequence of the Covid-19 pandemic are lease modifications, and accounts for them in accordance with other applicable guidance.

Group as a lessor

As a lessor, the Group continues to classify leases as either finance leases or operating leases and account for those two types of leases differently. Where the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset it is classified as a finance lease and if not is an operating lease.

When the Group is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. Where the sub-lease is classified as a finance lease, the right-of-use asset with respect to the head lease is derecognised and a finance lease receivable is recognised equal to the net investment in the sub-lease. The net investment in the lease is calculated as the present value of the aggregate of lease payments receivable and any unguaranteed residual value. Where the interest rate implicit in the sub-lease cannot be readily determined, the Group uses the discount rate used for the head lease.

The Group recognises lease payments received under operating leases as income on a straight-line basis over the lease term as part of 'other revenue'.

Retirement benefits

Defined contribution schemes

Payments to defined contribution schemes are charged to the Income Statement as they fall due. The Group has no legal or constructive obligation to pay further contributions into a defined contribution scheme if the fund has insufficient assets to pay all employees benefits relating to employee service in the current and prior periods.

Defined benefit schemes

Plan assets, including qualifying insurance policies, are measured at fair value and plan liabilities are measured on an actuarial basis, using the projected unit credit method and discounted at an interest rate equivalent to the current rate of return on a high quality corporate bond of equivalent currency and term to the plan liabilities. The difference between the value of plan assets and liabilities at the period-end date is the amount of surplus or deficit recorded in the Group Balance Sheet as an asset or liability. An asset is recognised when the employer has an unconditional right to use the surplus at some point during the life of the plan or on its wind-up.

Current service costs are recognised within operating costs in the Income Statement. Past service costs and gains, which are the change in the present value of the defined benefit obligation for employee service in prior periods resulting from plan amendments, are recognised immediately the plan amendment occurs. Net interest is calculated by applying a discount rate to the net defined benefit liability or asset and is recognised within finance costs.

Re-measurements comprise actuarial gains and losses and the return on plan assets (excluding amounts included in net interest). Actuarial gains and losses may result from differences between the actuarial assumptions underlying the plan liabilities and actual experience during the year or changes in the actuarial assumptions used in the valuation of the plan liabilities. Re-measurement gains and losses, and taxation thereon, are recognised in Other Comprehensive Income and are not reclassified to profit or loss in subsequent periods.

Full actuarial valuations are carried out triennially and are updated for material transactions and other material changes in circumstances up to the end of the reporting period.

Share-based payments

The Group awards equity-settled share-based payments to certain employees, under which the Group receives services from employees as consideration for equity instruments (options) of the Group. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense. The total amount to be expensed is determined by reference to the fair value of the options granted, excluding the impact of any non-market service and performance vesting conditions (for example, profitability, sales growth targets and remaining an employee of the Group over a specified time period). Non-market vesting conditions are included in assumptions about the number of options that are expected to vest. The total amount expensed is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At each balance sheet date, the Group revises its estimates of the number of options that are expected to vest based on the non-market vesting conditions. It recognises the impact of the revision to original estimates, if any, in the Income Statement, with a corresponding adjustment to equity.

2 Accounting policies continued

Share capital, share premium and dividends

Where either the Company or employee share trusts purchase the Company's equity share capital, the consideration paid, including any transaction costs, is deducted from total shareholders' equity as own shares until they are cancelled or re-issued. Any consideration subsequently received on sale or re-issue is included in shareholders' equity.

Dividend distributions to the Company's shareholders are recognised as a liability in the Group's Financial Statements on the date when dividends are approved by the Company's shareholders. Interim dividends are recognised in the period they are paid.

New standards and interpretations not applied

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2020 reporting periods and have not been early adopted by the Group:

- Onerous contracts; cost of fulfilling a contract - amendments to IAS 37
- Interest Rate Benchmark Reform – Phase 2 – Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16
- Annual improvements to IFRS standards 2018 – 2020
- Property, plant and equipment; proceeds before intended use – amendments to IAS 16
- Revised Conceptual Framework for Financial Reporting
- Classification of liabilities as current or non-current - amendments to IAS 1
- Amendments to IFRS 17 'Insurance Contracts'

These standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

3 Exchange rates

The most significant exchange rates to UK Sterling for the Group are as follows:

	2020 Closing rate	2020 Average rate	2019 Closing rate	2019 Average rate
US Dollar	1.37	1.28	1.33	1.28
Canadian Dollar	1.74	1.72	1.72	1.69
Euro	1.12	1.13	1.18	1.14

If the results for the year to 31 December 2019 had been retranslated at the average exchange rates for the year to 31 December 2020, North America would have achieved underlying operating profit of £122.2m on revenue of £1,222.5m, compared with underlying operating profit of £123.0m on revenue of £1,230.1m as reported, and ALSA would have achieved a underlying operating profit of £111.0m on revenue of £836.1m, compared with underlying operating profit of £109.5m on revenue of £824.7m as reported.

4 Revenue and segmental analysis

The Group's reportable segments have been determined based on reports issued to and reviewed by the Group Executive Committee, and are organised in accordance with the geographical regions in which they operate and nature of services that they provide. Management considers the Group Executive Committee to be the chief decision-making body for deciding how to allocate resources and for assessing operating performance.

Segmental performance is evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the Consolidated Financial Statements. Group financing activities and income taxes are managed on a group basis and are not allocated to reportable segments.

The principal services from which each reportable segment derives its revenues are as follows:

- UK – bus and coach operations
- German Rail – rail operations
- ALSA (predominantly Spain and Morocco) – bus and coach operations
- North America (USA and Canada) – school bus, transit bus and shuttle operations

Further details on the activities of each segment are described in the Strategic Report.

Central functions is not a reportable segment but has been included in the segmental analysis for transparency and to enable a reconciliation to the consolidated Group.

4 Revenue and segmental analysis continued

(a) Revenue

Revenue is disaggregated by reportable segment, class and type of service as follows:

Analysis by class and reportable segment:	2020					
	Contract revenues £m	Passenger revenues £m	Grants and subsidies £m	Private hire £m	Other revenues £m	Total £m
UK	24.1	194.1	135.7	26.1	8.2	388.2
German Rail	–	38.5	94.5	–	6.2	139.2
ALSA	134.1	276.3	106.7	27.9	14.3	559.3
North America	826.4	–	–	24.6	18.2	869.2
Central functions	–	–	–	–	–	–
Total revenue	984.6	508.9	336.9	78.6	46.9	1,955.9

Analysis by major service type:						
	Contract revenues £m	Passenger revenues £m	Grants and subsidies £m	Private hire £m	Other revenues £m	Total £m
Passenger transport	984.6	508.9	336.9	78.6	24.9	1,933.9
Other products and services	–	–	–	–	22.0	22.0
Total revenue	984.6	508.9	336.9	78.6	46.9	1,955.9

Included in grants and subsidies is £84.7m (2019: nil) revenue recognised in the UK in respect of the Covid Bus Services Support Grant (CBSSG) in England and Covid Support Grant (CSG) in Scotland. Under these schemes, grant income may be claimed by operators of local bus services in England and Scotland to close the shortfall of revenue earned by them during the period affected by Covid-19 and the costs incurred by them in that period. The grant income is recognised in the Income Statement in the same period in which the related shortfall of revenue over costs is incurred to the extent there is reasonable certainty that: (i) the Group will comply with the conditions attaching to the grant and (ii) the grant will be received and retained by the Group, taking account of the potential adjustments to grant payments as a result of the review process.

Also included in grants and subsidies is £15.6m (2019: nil) additional subsidies in Germany in respect of the Federal Framework Regulation on Aid to Public Transport. Under this arrangement, additional subsidies may be claimed by public transport operators in Germany to compensate for the loss of passenger revenue due to Covid-19. Similarly, a further £15.3m (2019: nil) was recognised in ALSA from Public Transport Authorities to compensate for revenue shortfalls due to Covid-19. In both cases subsidy income has been recognised in the same period in the Income Statement to match the period in which the related shortfall of revenue occurred and to the extent there is reasonable certainty that the Group has complied with the conditions.

In German Rail, at the commencement of the Rhine-Münster Express (RME) contract in 2015 a fixed amount of subsidy was agreed with the PTA for the life of the contract and the amount recognised each year was measured by considering the proportion of contract costs incurred at each balance sheet date. As it does every year, the Group has re-forecast the contract out-turn and re-assessed the estimate of the stage of completion. As a result of Covid-19 this year the re-assessment resulted in revenue recognised in previous years totalling £5.2m being reversed and re-phased to later years.

There have been no other material amounts of revenue recognised in the year that relate to performance obligations satisfied or partially satisfied in previous years. Revenue received where the performance obligation will be fulfilled in the future is classified as deferred income or contract liabilities and disclosed in note 24.

Analysis by class and reportable segment:	2019					
	Contract revenues £m	Passenger revenues £m	Grants and subsidies £m	Private hire £m	Other revenues £m	Total £m
UK	41.4	464.2	54.8	14.2	25.1	599.7
German Rail	–	49.8	35.7	–	4.4	89.9
ALSA	207.8	492.7	18.3	56.7	49.2	824.7

	1,955.9	2,744.4	3,085.0	3,250.0

Due to the nature of the Group's businesses, the origin and destination of revenue are the same.

No single external customer amounts to 10% or more of the total revenue.

Information reported to the Group Executive Committee does not regularly include an analysis of assets and liabilities by segment.

5 Separately disclosed items

As set out in our accounting policies, we report underlying measures because we believe they provide both management and stakeholders with useful additional information about the financial performance of the Group's businesses.

The total separately disclosed items before tax for the year ended 31 December is a net charge of £338.6m (2019: £53.0m). The items excluded from the underlying result are:

	2020 £m	2019 £m
Intangible amortisation for acquired businesses (a)	(52.6)	(53.0)
Directly attributable gains and losses resulting from the Covid-19 pandemic (b)	(262.5)	-
Restructuring costs (c)	(14.0)	(8.8)
Other separately disclosed items (d)	(1.5)	8.8
Separately disclosed operating cost items	(330.6)	(53.0)
Interest charges directly resulting from the Covid-19 pandemic (e)	(8.0)	-
Total separately disclosed items	(338.6)	(53.0)

(a) Intangible amortisation for acquired businesses

Consistent with previous periods the Group continues to classify the amortisation for acquired intangibles as a separately disclosed item.

(b) Directly attributable gains and losses resulting from the Covid-19 pandemic

As a result of the Covid-19 pandemic and in order to improve the transparency and usefulness of the financial information, the Group has identified a net expense of £262.5m relating to directly attributable gains and losses resulting from the pandemic. The net result relates to five separately identifiable areas of accounting judgement and estimates as follows:

	2020 £m
One-off costs, cancellation charges and compensation payments (i)	(46.4)
Discontinuation of fuel trades (ii)	(17.3)
Onerous contract provisions and associated impairment (iii)	(133.4)
Re-measurement of the WeDriveU put liability (iv)	33.9
Impairments and associated charges (v)	(99.3)
	(262.5)

These items are considered to be separately disclosed items as they meet the Group's definition, being both significant in nature and value to the results of the Group in the current period. The impact that Covid-19 has had on underlying trading, such as the impact of lost revenue, is not recognised within separately disclosed items.

Further charges are anticipated during 2021 to reflect actions that will be taken as a direct result of the length of time that any government restrictions or safety requirements are in place, and customer behaviour is impacted.

5 Separately disclosed items continued

(i) One-off costs, cancellation charges and compensation payments (£46.4m expense)

The Group incurred a total of £15.9m of one-off charges primarily relating to incremental health and safety costs, legal and professional fees relating to a) the arrangement of the Bank of England's CCF and b) covenant waivers on the Group's banking facilities, and transaction costs associated with the cancellation of projects and acquisitions.

In addition, to maintain and secure the Group's supply base in order to be able to rapidly and flexibly increase capacity as demand picks up, the Group made a number of compensatory payments to third party coach operators totalling £12.7m.

The Group also incurred costs from penalties (whereby the pandemic prevented it from fulfilling certain contractual obligations), the write-off of receivables (where settlement arrangements were reached with customers) and from making a provision for employee compensation claims as a consequence of Covid-19.

(ii) Discontinuation of fuel trades (£17.3m expense)

Hedge accounting was discontinued for a number of fuel derivatives where volumes were in excess of actual or expected consumption, as a result of the impact of Covid-19. This resulted in a £17.3m expense being recycled from Other Comprehensive Income to the Income Statement.

For the remaining effective hedges, gains or losses on the derivatives continue to be recognised in Equity and on settlement are recycled to the Income Statement against the respective operating expense, and are not included in separately disclosed items.

(iii) Onerous contract provisions and associated impairment (£133.4m expense)

As a result of the pandemic, the Group undertook a review of its contracts with customers, and recorded onerous contract provisions totalling £105.7m across the Group, of which £64.8m was utilised in the current year. The majority of these contracts had only one to two years remaining and given the impact of Covid-19 on these contracts the Group considered it probable that the contract losses could not be recovered over the remaining contract term. In conjunction with these contracts, customer contract intangibles, property, plant and equipment and costs to fulfil a contract, totalling £15.7m, were impaired.

In last year's notes to the Financial Statements, a contingent liability was disclosed with respect to the Rhine- Rühr Express contract in German Rail on the basis that the Directors considered that it was possible, but not probable, that it could be loss making in the future. Consideration for the Group's services under this contract is fixed, with profitability dependent on the value of operating costs incurred by the Group. Following the launch of the third and final line in December 2020, and reflecting the pandemic impact over the short to medium term, as well as the updated outlook for operating costs, the latest assessment resulted in the impairment of contract costs recorded within intangibles, totalling £16.8m, after which the contract was assessed to be profitable over the remaining term.

In addition, following the termination of a contract in North America, a previously recognised onerous contract provision of £6.5m was released in full and property, plant and equipment of £1.7m dedicated to the contract were impaired.

(iv) Re-measurement of the WeDriveU put liability (£33.9m gain)

The put liability, resulting from the acquisition of WeDriveU, is required to be re-measured at each reporting date. The gain of £33.9m has been derived from an internal valuation, using forecast earnings over the exercise period. Whilst the valuation previously assumed that the put options would be exercised in full at the latest possible date (31 December 2022), the vendor has now given notice to exercise put options over 10% of the equity of WeDriveU (with settlement expected during the first half of 2021). The remaining put options (over 30% of the equity) are assumed to be exercised at the end of 2022.

Whilst WeDriveU was broadly tracking as expected prior to Covid-19, some level of re-measurement may have arisen if new growth opportunities had not materialised. However the most significant driver for the gain is the adjustment to the short term earnings as a result of the pandemic. Consequently the gain has been categorised as part of the overall impact due to Covid-19.

The key assumptions used and their sensitivities are included in note 25.

(v) Impairments and associated charges (£99.3m expense)

In addition to the Group's goodwill impairment test and the identification of assets relating to onerous contracts, the Group reviewed its non-current assets to assess whether the impact of the pandemic and the subsequent restructuring activity changed the usage of such assets. Furthermore, during the year the Group decided to exit certain contracts or lines of business that were anticipated to be low margin over the medium term and/or that were now considered less strategically relevant. Accordingly, any dedicated assets associated with these contract or lines of business were identified and assessed for impairment, after first considering if they could be re-used or repurposed.

The overall result of this review was the impairment of £67.5m of property, plant and equipment, including £63.0m public service vehicles. In addition, £7.3m of goodwill and £23.3m of intangible assets were impaired, including £21.7m of customer contracts.

5 Separately disclosed items continued

(c) Restructuring costs

During the period, the Group incurred £14.0m of costs in respect of group-wide restructuring initiatives and redundancies, as part of the Group's mitigations against the adverse impact of the pandemic on profit and cash.

During the prior year, the Group incurred restructuring and redundancy costs in North America following changes in the management of school bus and transit businesses and other associated costs.

(d) Other separately disclosed items

The Group has recognised an expense of £0.8m in respect of equalisation of Guaranteed Minimum Pensions (GMP). In October 2018 the High Court ruled that GMP should be equalised between men and women. Whilst in 2018 the Group equalised benefits for existing members, a further High Court ruling in November 2020 provided further detail and this resulted in the charge recognised in the year.

During the prior year the Group disposed of its 100% interest in Ecolane Finland OY and Ecolane USA, Inc., providers of transit management software programmes, in exchange for cash and an 8.8% stake in the purchaser's holding company, Transit Technologies Holdco. A net gain of £8.8m, after transaction costs was recognised. In the current year, this gain was reduced by £0.6m relating to the final settlement of amounts that were held in escrow.

(e) Interest charges

Interest charges of £8.0m primarily relate to fees associated with the gearing covenant waiver on the Group's US private placement and banking facilities and the Bank of England's CCFE programme. The CCFE facility was unutilised during the period and not used to underpin the Group's underlying operating activities. Consequently these charges are not considered to be an underlying finance cost of the Group.

6 Operating costs

	2020 £m	2019 £m
Cost of inventories recognised in expense	81.0	82.8
Staff costs	1,138.8	1,416.7
Depreciation		
– owned assets	146.3	132.4
– leased assets	77.3	70.7
Intangible asset amortisation	69.0	59.7
Gain on disposal of property, plant and equipment	(8.7)	(10.3)
Gain on disposal of intangible assets	(2.3)	(3.6)
Amortisation of fixed asset grants	(2.9)	(1.3)
Leases (note 35)		
– variable lease payments	–	–
– expenses relating to short-term leases	7.9	10.3
– expenses relating to leases of low-value assets	5.2	7.6
– Covid-19-related rent concessions	(0.7)	–
Separately disclosed items ¹ (note 5)	278.0	–
Other charges	548.4	737.1
Total operating costs	2,337.3	2,502.1

¹ Excludes amortisation from acquired intangibles which is included within intangible asset amortisation above

In addition to revenue related grants as disclosed in note 4, government grants have also been recognised in relation to expenses totalling £54.9m (2019: £nil) in response to the Covid-19 pandemic. These arrangements were designed to provide relief to companies in respect of staff costs for jobs retained amid the pandemic. The principal arrangements are the Coronavirus Job Retention Scheme (CJRS) in the UK, ERTE in Spain and Switzerland, CNSS in Morocco and the US CARES Act in North America. The amounts recognised reflect the grants receivable in respect of the year ended 31 December 2020 and relate to the costs reclaimable for employees furloughed or retained to the extent that it is reasonably certain that the grant will be received. These grants have been netted within staff costs.

7 Auditor's remuneration

An analysis of fees paid to the Group's auditor is provided below:

	2020 £m	2019 £m
Audit of the financial statements	0.7	0.5
Audit of subsidiaries	0.9	0.9
Audit-related assurance services	0.4	0.1
	2.0	1.5

8 Employee benefit costs

(a) Staff costs

	2020 £m	2019 £m
Wages and salaries	987.8	1,234.5
Social security costs	139.6	165.5
Pension costs (note 34)	11.2	10.3
Share-based payment (note 9)	0.2	6.4
	1,138.8	1,416.7

The average number of employees, including Executive Directors, during the year was as follows:

	2020	2019
Managerial and administrative	5,150	4,934
Operational	46,603	44,644
	51,753	49,578

Included in the above are the following costs related to the Group's key management personnel who comprise the Executive Directors of the parent Company. Further details are disclosed in the Directors' Remuneration Report:

	2020 £m	2019 £m
Basic salaries	0.9	1.4
Benefits	0.3	0.7
Performance-related bonuses	-	2.2
Share-based payment	(0.4)	2.6
	0.8	6.9

(b) Share schemes

Details of options or awards outstanding at the end of the year under the Group's share schemes are as follows:

	Number of share options 2020	Number of share options 2019	Exercise price	Future exercise periods
Long-Term Incentive Plan	5,307,399	6,391,119	nil	2021-2025
West Midland Travel Long Service Option Scheme	160,859	134,956	175p-412p	2021-2030
Executive Deferred Bonus Plan	39,847	145,238	nil	2021
	5,508,105	6,671,313		

(i) Long-Term Incentive Plan (LTIP)

The LTIP is open to Executive Directors and Senior Management with awards made at the discretion of the Remuneration Committee, normally on an annual basis and in the form of a nil cost option over a certain number of shares in the Company. The vesting of shares on the third anniversary of grant is subject to the Group's achievement against specific performance conditions and growth targets set at the date of grant. These comprise diluted underlying earnings per share (EPS), return on capital employed (ROCE), the relative total shareholder return (TSR) of the Group against a comparator group of companies and the FTSE 250 Index, plus two new environmental performance measures from the 2020 LTIP award onwards. These new measures relate to a reduction in the Group's total carbon emissions per million passenger kilometre (tCO₂e/m pass km) and an increase in the number of zero emission vehicles (ZEVs) purchased or on order in the UK division, to advance its ambition to operate only zero emission vehicles in UK bus by 2030 and in UK coach by 2035. All are measured over the three-year financial period commencing with the year of grant. Unvested shares automatically lapse.

8 Employee benefit costs continued

An accrual entitlement in respect of dividends paid by the Company during the vesting period attaches to vested shares and is paid to participants on vesting. Similarly, dividends are payable on unexercised vested shares held by Executive Directors during their compulsory two-year holding period which runs from the date of vesting (in parallel with the two-year exercise period).

The LTIP allows for the grant to UK participants of an HMRC approved share option over shares with a market value of up to a maximum of £30,000 outstanding at any time. These are awarded at the same time as, and with the same performance conditions as, the LTIP awards and work by way of set-off versus the vested LTIP share value on exercise with the excess LTIP option award being forfeited.

Vested shares for all LTIP awards are normally delivered in the form of market purchased shares held in the Company's Employee Benefit Trust (the Trust). No cash settlement alternative is available at present.

(ii) Executive Deferred Bonus Plan (EDBP)

The delivery of the annual bonus award for Executive Directors is structured in two distinct parts, an initial cash payment under the annual bonus plan and a one-year deferred payment award in the form of forfeitable shares in the Company granted under the EDBP. Release of the shares on the first anniversary of grant is not subject to any additional performance condition, save for continuing employment. Participants are entitled to receive any dividends paid by the Company on the shares while they are held in the Trust during the deferred period.

(iii) West Midlands Travel Long Service Option Scheme (WMT LSOS)

The WMT LSOS is used to reward WMT employees who attain 25 years' service. The market-value option award over a certain number of shares in the Company is exercisable between the third and tenth anniversary of grant. There are no performance conditions and shares are delivered on exercise through the Trust. No cash settlement alternative is available. During the year, the WMT LSOS was closed to new participants.

The Travel West Midland Share Incentive Plan (TWM SIP), already having been closed to new entrants, has now been fully closed. No shares (2019: 1,079) were held by the Trustee for the benefit of existing participants.

9 Share-based payments

The charge in respect of share-based payment transactions included in the Group's Income Statement for the year is as follows:

	2020 £m	2019 £m
Expense arising from share and share option plans	0.2	6.4

During the year ended 31 December 2020, the Group had three share-based payment arrangements, which are described in note 8(b).

For the following disclosure, share options with a nil exercise price have been disclosed separately to avoid distorting the weighted average exercise prices. The number of share options in existence during the year was as follows:

	2020		2019	
	Number of share options	Weighted average exercise price p	Number of share options	Weighted average exercise price p
Options without a nil exercise price:				
At 1 January	134,956	320	155,521	298
Granted during the year	45,000	175	15,000	412
Forfeited during the year	(1,000)	412	(8,773)	325
Exercised during the year	(5,351)	285	(19,802)	283
Expired during the year	(12,746)	269	(6,990)	129
Outstanding at 31 December	160,859	283	134,956	320
Exercisable at 31 December	81,859	295	87,156	282
Options with a nil exercise price:				
At 1 January	6,536,357	nil	6,090,694	nil
Granted during the year	3,248,293	nil	2,327,084	nil
Forfeited during the year	(2,687,710)	nil	-	nil
Exercised during the year	(1,547,568)	nil	(1,805,321)	nil
Expired during the year	(202,126)	nil	(76,100)	nil
Outstanding at 31 December	5,347,246	nil	6,536,357	nil
Exercisable at 31 December	540,248	nil	391,272	nil
Total outstanding at 31 December	5,508,105		6,671,313	
Total exercisable at 31 December	622,107		478,428	

9 Share-based payments continued

The options outstanding at 31 December 2020 had exercise prices that were between 175p and 412p (2019: between 225p and 412p) excluding options with a nil exercise price. The range of exercise prices for options was as follows:

Exercise price (p)	2020	2019
	Number	Number
100-300	84,199	52,818
301-350	32,760	34,338
351-450	43,900	47,800
	160,859	134,956

The options have a weighted average contractual life of one year (2019: one year). Options were exercised regularly throughout the year and the weighted average share price at exercise was 210p (2019: 417p).

The weighted average fair value of the share options granted during the year was calculated using a stochastic model, with the following assumptions and inputs:

	Share options without nil exercise price		Share options with nil exercise price	
	2020	2019	2020	2019
Risk-free interest rate	0.15%	0.72%	0.22%	0.78%
Expected volatility	23%	20%	23%	16%
Peer group volatility	–	–	33%-44%	25-31%
Expected option life in years	5 years	5 years	3 years	3 years
Expected dividend yield	3.62%	3.65%	0.00%	0.00%
Weighted average share price at grant date	209p	412p	276p	414p
Weighted average exercise price at grant date	175p	412p	nil	nil
Weighted average fair value of options at grant date	38p	42p	231p	337p

Experience to date has shown that approximately 24% (2019: 24%) of options are exercised early, principally due to leavers. This has been incorporated into the calculation of the expected option life for the share options without nil exercise price.

Expected volatility in the table above was determined from historical volatility over the last eight years, adjusted for one-off events that were not considered to be reflective of the volatility of the share price going forward. The expected dividend yield represents the dividends declared in the 12 months preceding the date of the grant, divided by the average share price in the month preceding the date of the grant.

For share options granted during the year under the LTIP, the TSR targets have been reflected in the calculation of the fair value of the options above.

10 Net finance costs

	2020	2019
	£m	£m
Bond and bank interest payable	(36.3)	(40.9)
Lease interest payable (note 35)	(12.6)	(12.8)
Other interest payable	(4.3)	(4.7)
Unwind of discounting	(1.6)	(2.7)
Net interest cost on defined benefit pension obligations (note 34)	(1.7)	(3.2)
Finance costs before separately disclosed items	(56.5)	(64.3)
Separately disclosed finance costs (note 5)	(8.0)	–
Total finance costs	(64.5)	(64.3)
Lease interest income (note 35)	0.6	0.2
Other financial income	2.7	8.4
Net finance costs	(61.2)	(55.7)
Of which, from financial instruments:		
Financial assets measured at amortised cost	0.7	0.8
Financial liabilities measured at amortised cost	(51.3)	(57.1)
Derivatives	2.0	7.6
Loan fee amortisation	(1.7)	(1.3)

11 Taxation

(a) Analysis of taxation (credit)/charge in the year

	2020 £m	2019 £m
Current taxation:		
UK corporation tax	(8.4)	7.7
Overseas taxation	10.1	20.4
Current income tax charge	1.7	28.1
Adjustments with respect to prior years – UK and overseas	(1.8)	(7.0)
Total current income tax (credit)/charge	(0.1)	21.1
Deferred taxation (note 27):		
Origination and reversal of temporary differences	(119.6)	20.9
Adjustments with respect to prior years – UK and overseas	1.7	(3.3)
Deferred tax (credit)/charge	(117.9)	17.6
Total tax (credit)/charge for the Group	(118.0)	38.7
The tax (credit)/charge for the Group is disclosed as follows:		
Tax (credit)/charge on profit before separately disclosed items	(29.3)	55.2
Tax credit on separately disclosed items	(88.7)	(16.5)
	(118.0)	38.7

In the current year, the tax credit on separately disclosed items of £88.7m (2019: £16.5m) comprises an £11.5m tax credit on intangibles and £77.2m tax credit on tax deductible expenditure included in separately disclosed items.

The tax relief relating to intangible amortisation is determined by reference to the tax rates in the jurisdiction to which the intangible amortisation relates. The effective tax rate relating to intangible amortisation is significantly higher than the UK tax rate of 19% due to the weighting of intangibles in jurisdictions with higher tax rates than the UK, specifically the US (26%) and Spain (25%).

(b) Tax on items recognised in Other Comprehensive Income or Equity

	2020 £m	2019 £m
Current taxation:		
Current tax charge on exchange movements offset in reserves	–	1.7

(c) Reconciliation of the total tax (credit)/charge

	2020 £m	2019 £m
(Loss)/profit before income tax	(444.7)	187.0
Notional charge at UK corporation tax rate of 19% (2019: 19%)	(84.5)	35.5
Recurring items:		
Non-deductible goodwill impairment	1.5	–
Non-deductible intangible amortisation	0.3	1.2
Effect of overseas tax rates	(23.7)	7.7
Tax incentives	(0.6)	(1.2)
State taxes	(0.6)	–
Non-recurring items:		
Adjustments to prior years within current and deferred tax (excluding movements in tax provisions)	(0.1)	(10.3)
(Release)/increase of tax provisions	(8.4)	2.9
Non-deductible expenditure	(0.8)	2.9
Overseas financing deductions	(1.7)	–
Non-taxable profit on disposal of Investment	(6.5)	–
Current year losses not recognised	7.1	–
Total tax (credit)/charge reported in the Income Statement (note 11(a))	(118.0)	38.7

Included within the tax reconciliation are a number of non-recurring items, the effect of a reduction in recognition of Spanish tax losses and the release of tax provisions and a non-taxable disposal. Items expected to recur in the tax reconciliation for 2020 include the difference in rates between the UK and our overseas markets and tax incentives on re-investment credits. During the year it was announced that the UK corporation tax rate would no longer reduce to 17%. As at 31 December 2019 UK deferred tax was held at 17% therefore included within the deferred tax prior year adjustment is a tax credit of £1.2m in relation to change in UK tax rates. As at 31 December 2020 the UK deferred tax is held at 19%.

(d) Tax provisions

At 31 December 2020, the Group held tax provisions of £2.4m (2019: £10.8m), representing a number of tax uncertainties such as the deductibility of interest expense in the UK and Spain and tax audits in Spain. All UK corporation tax returns up to 2018 have been submitted and agreed by HMRC. The net decrease of £8.4m in tax provisions during the year represents; i) the release of tax reserves where the statute of limitation has closed (£0.5m), ii) a reduction in deferred tax assets in relation to Spanish issues (£2.9m) and iii) a decrease of tax reserves relating to risks in the US business (£5.0m). Based on the experience of the Group Tax department and after discussions of the various tax uncertainties with our tax advisers, the year end tax provision represents management's best estimate of the tax uncertainties of which we are aware. The provision for the Group's tax uncertainties of £2.4m is included in current tax liabilities.

(e) Temporary differences associated with Group investments

No deferred tax (2019: £nil) is recognised on the unremitted earnings of subsidiaries, associates and joint ventures, as the Group has determined that these undistributed profits will not be distributed in the near future. As a result of changes to tax legislation in 2009, overseas dividends received on or after 1 July 2009 are generally exempt from UK corporation tax, but may be subject to withholding tax. There are no temporary differences (2019: £nil) associated with investments in subsidiaries, associates and joint ventures, for which a deferred tax liability has not been recognised but for which a tax liability may arise.

(f) Unrecognised tax losses

Deferred income tax assets are recognised for tax loss carry-forwards to the extent that the realisation of the related tax benefit against future taxable profits is probable. Based on current forecasts, it is estimated that the losses recognised for deferred tax purposes will be utilised within three to four years. UK and overseas deferred tax assets that the Group has not recognised in the Financial Statements relates to gross losses of £6.3m (2019: £17.7m), which arise in tax jurisdictions where the Group does not expect to generate sufficient suitable future taxable profits. The majority of the unrecognised losses relates to US entities where it is uncertain when, or if, the losses will be utilised.

(g) Deferred tax included in the Income Statement

	2020 £m	2019 £m
Accelerated capital allowances	20.6	29.8
Other short-term temporary differences	(33.6)	6.6
Recognition of losses	(104.9)	(18.8)
Deferred tax (credit)/charge (note 11(a))	(117.9)	17.6

Details on the Balance Sheet position of deferred tax are included in note 27.

11 Taxation continued

(h) Factors that may affect future tax charges

On 3 March 2021 the UK Chancellor of the exchequer announced a tax rise from 19% to 25% from 1 April 2023. Currently the UK deferred tax asset is held at 19% therefore the increase in tax rate would lead to a tax credit of £12.8m through the profit and loss account and £9.3m through the SOCIE.

12 Dividends paid and proposed

	2020 £m	2019 £m
Declared and paid during the year		
Ordinary final dividend for 2019 paid of nil per share (2018: 10.17p)	–	51.9
Ordinary interim dividend for 2020 of nil per share (2019: 5.16p)	–	26.4
	–	78.3
Proposed for approval (not recognised as a liability at 31 December)		
Ordinary final dividend for 2020 of nil per share (2019: 11.19p per share)	–	57.1

¹ In the period, due to the impact of the Covid-19 pandemic and associated business and economic uncertainty the Group cancelled its final 2019 dividend of 11.19p per share, which would have been due on 12 May 2020.

A final dividend has not been proposed for the current period.

13 Earnings per share

	2020	2019
Basic earnings per share	(57.9)p	27.6p
Underlying basic earnings per share	(14.6)p	34.5p
Diluted earnings per share	(57.9)p	27.5p
Underlying diluted earnings per share	(14.6)p	34.4p

Basic EPS is calculated by dividing the earnings attributable to equity shareholders, a loss of £333.8m (2019: £141.1m profit) by the weighted average number of ordinary shares in issue during the year, excluding those held by the Group's Employee Benefit Trust (note 32) which are treated as cancelled. Earnings attributable to equity shareholders is inclusive of amounts accruing to the holders of the hybrid instrument and is calculated as follows:

	2020 £m	2019 £m
(Loss)/profit attributable to equity shareholders	(331.7)	141.1
Accrued payments on hybrid instrument	(2.1)	–
Earnings attributable to equity shareholders	(333.8)	141.1

For diluted EPS, the weighted average number of ordinary shares in issue during the year is adjusted to include the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

The reconciliation of basic and diluted weighted average number of ordinary shares is as follows:

	2020	2019
Basic weighted average shares	576,031,523	510,435,913
Adjustment for dilutive potential ordinary shares ¹	–	2,433,486
Diluted weighted average shares	576,031,523	512,869,399

¹ Potential ordinary shares have the effect of being anti-dilutive in 2020 and therefore have been excluded from the calculation

The underlying basic and underlying diluted earnings per share have been calculated in addition to the basic and diluted earnings per share required by IAS 33 since, in the opinion of the Directors, they reflect the underlying performance of the business' operations.

The reconciliation of the earnings and earnings per share to their underlying equivalent is as follows:

	2020			2019		
	£m	Basic EPS p	Diluted EPS p	£m	Basic EPS p	Diluted EPS p
Earnings attributable to equity shareholders	(333.8)	(57.9)	(57.9)	141.1	27.6	27.5
Separately disclosed items	338.6	58.8	58.8	53.0	10.4	10.3
Separately disclosed tax	(88.7)	(15.4)	(15.4)	(16.5)	(3.2)	(3.2)
Separately disclosed non-controlling interests	(0.3)	(0.1)	(0.1)	(1.4)	(0.3)	(0.2)
Underlying (loss)/profit attributable to equity shareholders¹	(84.2)	(14.6)	(14.6)	176.2	34.5	34.4

¹ Includes amounts accruing to the holders of the hybrid instrument

At 31 December 2020	662.8	4.8	85.2	23.7	776.5	48.7	825.2
Net book value:							
At 31 December 2020	199.0	72.6	41.7	13.1	326.4	1,525.4	1,851.8
At 1 January 2020	281.8	73.6	36.8	23.1	415.3	1,486.5	1,901.8

The impairment charge includes £30.5m of assets (2019: £nil) which arose following strategic reviews in the ALSA and North America divisions, and with respect to onerous contracts, £12.9m (2019: £nil) of customer contract intangibles in ALSA and £16.8m (2019: £nil) franchise contract costs in German Rail.

The Group recognises infrastructure investment intangibles for public service vehicles where the Group has the right to charge passengers of the public service in accordance with IFRIC 12 'Service Concession Arrangements'. Note 38 includes further details of the Group's service concession arrangements.

Customer contracts includes the following individually material assets, all of which arose through past acquisitions.

Segment	Nature of contract	Remaining useful economic life at 31 December 2020	Net book value at 31 December 2020 £m	Remaining useful economic life at 31 December 2019	Net book value at 31 December 2019 £m

At 31 December 2019	565.4	0.9	72.3	4.3	642.9	39.6	682.5
Net book value:							
At 31 December 2019	281.8	73.6	36.8	23.1	415.3	1,486.5	1,901.8
At 1 January 2019	288.8	–	29.6	18.5	336.9	1,460.6	1,797.5

Goodwill has been allocated to individual cash-generating units for annual impairment testing on the basis of the Group's business operations. The carrying value by cash-generating unit is as follows:

	2020 £m	2019 £m
UK	52.6	29.0
North America	652.7	679.4
ALSA	820.1	778.1
	1,525.4	1,486.5

The calculation of value in use for each group of cash-generating units is most sensitive to the assumptions over discount rates and the growth rate used to extrapolate cash flows into perpetuity beyond the three-year period of the management plan.

The key assumptions used for the cash-generating units are as follows:

	Pre-tax discount rate applied to cash flow projections		Growth rate used to extrapolate cash flows into perpetuity	
	2020	2019	2020	2019
UK	7.7%	6.4%	2.5%	2.5%
North America	7.6%	6.3%	3.1%	2.9%
ALSA	8.3%	7.3%	3.0%	2.5%

The discount rates increased significantly in the year but remain no higher than they were in 2018.

The key estimates applied in the impairment review are the forecast level of revenue, operating margins and the proportion of operating profit converted to cash in each year. Forecast revenue and operating margins are based on past performance and management's expectations for the future, including an estimate of the continuing impact of the Covid-19 pandemic. A growth rate for each division has been consistently applied in the impairment review for all cash-generating units based on current forecasts and long-term country-specific GDP growth rates. The cash flows are discounted using pre-tax rates that are calculated from country-specific weighted average cost of capital (WACC), principally derived from external sources. Capital expenditure is projected over the first three years using a detailed, contract-by-contract level forecast of the capital requirements of the Group for new and replacement vehicles and other assets. In the extrapolation of cash flows into perpetuity (the "terminal value"), capital expenditure is assumed to be a 1:1 ratio to depreciation.

The value in use of the North America division exceeds its carrying amount by £633.6m (2019: £1,371.6m, 2018: £424.9m). The reduction in the excess of the value in use over the carrying amount is due to the discount rate returning back to what it was in 2018.

14 Intangible assets continued

The value in use of the ALSA division exceeds its carrying amount by £266.8m (2019: £424.9m, 2018: £139.5m).

The assumptions used to derive the cash flow projections over the first three years of the impairment assessment are consistent with those used for the going concern and viability assessments, for which the assumptions are detailed in note 2 (for the going concern assessment) and in the viability statement. In summary, the base case projections assume Group revenue recovers to pre-pandemic levels in 2022 whereas the downside scenario assumes this is a year later, in 2023. However, whilst the pace of recovery due to the pandemic in the next one to two years could differ from that modelled, the vast majority of the value in use is in the terminal value, which is derived by applying the growth rate to the terminal year cash flow projection. Beyond the uncertainty over the medium term recovery, the Directors do not currently assume there to be any long-term net adverse impact from the pandemic. Applying the downside scenarios used for going concern or viability assessments does not materially alter the amounts by which the value in use exceeds the carrying amount.

Sensitivities to key and other assumptions

(i) North America

For North America, sensitivity analysis has been completed on each key assumption in isolation. This indicates that the value in use of the North America division will be equal to its carrying value with an increase in the pre-tax discount rate of 2.1% (2019: 3.0%) or a reduction in the growth rates used to extrapolate cash flows into perpetuity of 2.2% (2019: 3.2%).

In addition, for North America, a reduction in operating profit margin of 2.8% (2019: 3.9%) will result in the value in use of the division being equal to its carrying amount.

Given the significant amount by which value in use exceeds the carrying amount, management does not consider a reasonably possible change in key assumptions would result in an impairment in the North America division.

(ii) ALSA

For ALSA, sensitivity analysis on each key assumption indicates that the value in use will be equal to its carrying amount following an increase in the pre-tax discount rate of 1.1% (2019: 1.5%) or a reduction in growth rates used to extrapolate cash flows into perpetuity of 1.1% (2019: 1.5%).

A reduction in ALSA's operating profit margin of 1.6% (2019: 1.9%) will result in the value in use of the division being equal to its carrying amount.

Management have also performed sensitivity analysis to assess the impact that a combination of reasonably possible changes in the key assumptions would have on the recoverable amount of the ALSA division. In combination, a 20% reduction in the cash flows in 2021 and 2022, a 1.0% reduction in the long term growth rate and a 1.0% increase in the pre-tax discount rate would lead to a £168m impairment in ALSA.

The Directors have concluded that there is no risk of impairment for the UK and have not provided sensitivity disclosure required by IAS 36.

The Directors consider the assumptions used to be consistent with the historical performance of each cash-generating unit and to be realistically achievable in light of economic and industry measures and forecasts and therefore that goodwill is not impaired.

¹ Opening balances were restated for the adoption of IFRS 16 'Leases'

During the prior year, the Group entered into an asset exchange transaction, in which it swapped an existing property for a new piece of land and a funding arrangement to construct a new property. As the funding of the new property was contingent on planning permission being granted, about which there was no certainty, consideration for the transaction was restricted to the fair value of the new land exchanged in accordance with IFRS 15. The movement analysis above includes the disposal of the property and the fair value of the new land acquired as a result of the exchange. During 2020 the Group has assessed that planning is highly probable and recognised further amounts in respect of the transaction, see note 22 for further details.

Details of leased assets included within property, plant and equipment are provided in note 35.

16 Subsidiaries

The companies listed below include all those which principally affect the results and net assets of the Group. A full list of subsidiaries, joint ventures and associates is disclosed in note 40, along with the addresses of their registered offices. The principal country of operation in respect of the companies below is the country in which they are incorporated.

National Express Group PLC is the beneficial owner of all the equity share capital, either itself or through subsidiaries, of the companies.

Other small investments within ALSA	ALSA	1-16	1-16

Financial assets at fair value through other comprehensive income comprise holdings in equity shares of non-listed companies. The Group elected to designate the non-listed equity investments at fair value through other comprehensive income as the Group considers these investments to be strategic in nature.

The fair value measurement of non-listed equity investments are categorised within Level 3 (i.e. the fair values are determined by reference to significant unobservable inputs), with the fair value of the two most significant investments totalling £12.1m at 31 December 2020 (2019: £13.5m). For the first of these, the fair value was determined using recent earnings. A 10% increase/(decrease) in earnings would result in a £0.6m increase/(decrease) respectively in the fair value of the investment. For the second investment, the fair value was determined using an estimate of the discounted future cash flows. Future cash flows are estimated based on inputs including passenger growth, consumer price inflation and operating margin. The fair value is most sensitive to changes in passenger growth and inflation assumptions. A 1% increase/(decrease) in passenger growth would result in a £0.5m increase/(decrease) respectively in the fair value of the investment, whereas, a 1% increase in inflation would result in a £2.9m increase in fair value, and a 1% decrease in inflation would result in a £2.6m decrease in the fair value of the investment.

No strategic investments were disposed of during 2020, and there were no transfers of any cumulative gain or loss within Equity relating to these investments. No dividends were received from the investments during 2020 (2019: nil).

18 Investments accounted for using the equity method

Investments accounted for using the equity method are as follows:

	2020 £m	2019 £m
Joint ventures	9.9	10.7
Associates	5.7	7.2
Total investments accounted for under the equity method	15.6	17.9

The Group's share of post-tax results from associates and joint ventures accounted for using the equity method is as follows:

	2020 £m	2019 £m
Share of joint venture's (loss)/profit	(0.5)	0.6
Share of associates' loss	(1.6)	(0.2)
Total share of results from associates and joint ventures	(2.1)	0.4

(a) Investments in joint ventures

The Group has one interest in a joint venture as follows:

Name	Country of registration	Activity	Proportion held %	
			2020	2019
Bahrain Public Transport Company W.L.L.	Kingdom of Bahrain	Operation of bus services	50	50

The summarised financial information for the joint venture is set out below:

	Bahrain Public Transport Company W.L.L.	
	2020 £m	2019 £m
Share of the joint venture's balance sheet and results		
Non-current assets	11.1	13.7
Current assets	5.8	6.2
Share of gross assets	16.9	19.9
Non-current liabilities	(2.8)	(3.8)
Current liabilities	(4.2)	(5.8)
Share of gross liabilities	(7.0)	(9.6)
Net assets	9.9	10.3
Revenue	5.8	9.4
Operating profit	0.6	1.6
(Loss)/profit after tax	(0.5)	0.5
(Loss)/profit for the year and total comprehensive income	(0.5)	0.5

A reconciliation of the above summarised information to the carrying amount in the Group's Financial Statements is as follows:

	Bahrain Public Transport Company W.L.L.	
	2020 £m	2019 £m
Group share of net assets of the joint venture	9.9	10.3
Adjustments to joint venture retained earnings ¹	-	0.4
Carrying amount	9.9	10.7

¹ Including effect of adoption of IFRS 16 'Leases' in 2019.

18 Investments accounted for using the equity method continued

(b) Investments in associates

The Group's interests in associates are as follows:

Name	Country of registration	Proportion held %
ALSA associates	Spain	17-80
North America associates	North America	20

ALSA's associates are generally involved in the operation of coach and bus services, management of bus stations and similar operations. North America associates include a start-up company offering app-based rideshare and childcare services in the San Francisco area and a software company which provides scheduling, dispatch and time management functions in the student transportation sector.

The summarised aggregated financial information for individually immaterial associates is set out below:

	2020 £m	2019 £m
Share of operating loss	(1.6)	(0.2)
Share of loss for the year and total comprehensive income and expenditure	(1.6)	(0.2)

19 Business combinations, disposals and assets held for sale

(a) Acquisitions - UK

During the period, the UK division acquired 100% control of Lucketts Group, a coach operator in Hampshire, England.

The fair values of the assets and liabilities acquired were as follows:

	£m
Intangibles	1.0
Property, plant and equipment	11.8
Inventory	0.3
Trade and other receivables	1.7
Cash and cash equivalents	5.2
Borrowings	(15.7)
Trade and other payables	(2.8)
Provisions	(0.6)
Deferred tax liabilities	(1.2)
Net assets acquired	(0.3)
Goodwill	22.6
Total consideration	22.3
Represented by:	
Cash consideration	14.8
Deferred consideration	7.5
	22.3

Trade and other receivables had a fair value and a gross contracted value of £1.9m. The best estimate at acquisition date of the contractual cash flows not to be collected was £0.2m.

Goodwill of £22.6m arising from the acquisition consists of certain intangible benefits that cannot be separately identified and measured due to their nature. This includes control over the acquired business and synergy benefits expected to be achieved. None of the goodwill recognised is expected to be deductible for income tax purposes.

Included in the consideration shown above is contingent consideration of £7.5m. The Group is required to pay contingent consideration on pre-determined EBITDA thresholds being met over a rolling three year period, with a minimum expected undiscounted payment of £nil and maximum expected undiscounted payment of £7.5m. Based on projections, the Group expects the maximum amount to be paid. The amount recognised is undiscounted as the effect of discounting is not material.

19 Business combinations, disposals and assets held for sale continued

The acquired business contributed £7.0m of revenue and a £3.8m loss to the Group's result for the period between the date of acquisition and the balance sheet date. Had the acquisition been completed on the first day of the financial year, the Group's revenue for the year would have been £1,959.2m and the Group's operating loss would have been £380.8m.

(b) Acquisitions – further information

Deferred consideration of £0.2m was paid in the period relating to acquisitions in the UK in earlier years. Total cash outflow in the period from acquisitions in the UK division was £9.8m, comprising consideration for current year acquisitions of £14.8m and deferred consideration of £0.2m, less cash acquired in the businesses of £5.2m.

In North America and ALSA deferred consideration of £26.9m and £0.2m respectively was paid in the period relating to acquisitions in earlier years.

In addition, during the period there was an increase in the provisional fair values of businesses acquired in prior years of £0.7m and £2.3m in the North America and ALSA divisions respectively, with a resultant decrease in goodwill. These changes included a net reduction in the borrowings acquired of £0.1m.

Total acquisition transaction costs of £0.4m were incurred in the year to 31 December 2020 (2019: £5.7m).

The Group measures deferred contingent consideration at fair value through the profit and loss and by reference to significant unobservable inputs i.e. classified as level 3 in the fair value hierarchy. The significant unobservable inputs used to determine the fair value of the contingent purchase consideration are typically forecast earnings or estimating the likelihood that contracts will be renewed over a fixed period. The fair value movement in deferred contingent consideration in the year is as follows:

	2020 £m
Fair value:	
At 1 January	49.0
Additions in the year	7.5
Payments during the year	(27.3)
Fair value movement in the year	(1.2)
Foreign exchange	0.8
At 31 December	28.8

(c) Disposals

On 31 December 2020, the Group disposed of its 100% interest in Tayside Public Transport Co Limited, a provider of bus transportation services in Dundee, Scotland, in exchange for cash. A loss of £0.1m was recognised and comprises gross cash consideration of £11.8m less transaction costs of £1.3m, working capital adjustment of £0.4m and net assets of £10.2m. Total cash inflow in the period from the disposal was £7.2m, comprising consideration of £11.8m, less transaction costs settled of £0.1m and cash disposed in the business of £4.5m.

On 24 July 2019, the Group disposed of its 100% interest in Ecolane Finland OY and Ecolane USA, Inc., providers of transit management software programmes, in exchange for cash and an 8.8% stake in the purchaser's holding company, Transit Technologies Holdco. The retained investment was accounted for as a financial asset at fair value through other comprehensive income. A gain of £8.8m was recognised within separately disclosed items representing net consideration of £30.3m, less net assets disposed of £22.5m and exchange gains recycled from the currency translation reserve totalling £1.0m. Total cash inflow in 2019 was £21.7m.

During 2020 and subject to the Group having fulfilled its obligations under the sales agreement, including the finalisation of the closing accounts, consideration held in escrow was returned to the Group totalling £3.5m. Closing adjustments resulted in a reduction of the original gain of £0.6m and which has been recognised in separately disclosed items during the year for consistency. Transaction expenses totalling £6.3m were settled during 2020. Total cash outflow in the year from the disposal was £2.8m. No further cash flows are expected in 2021.

(d) Assets held for sale

In ALSA, a building with a carrying value of £18.8m met the held for sale criteria of IFRS 5 at 31 December 2020.

In the prior year two buildings in North America were held for sale. These buildings were sold during 2020 and proceeds equal to the carrying value were received. The carrying value of the buildings at 31 December 2019 was £4.3m.

20 Non-current assets – trade and other receivables

	2020 £m	2019 ¹ £m
Contract assets	85.2	6.0
Prepayments	4.6	1.9
Other receivables	1.9	1.7
	91.7	9.6

¹ Prior year trade and other receivable balances have been represented with £6.0m reclassified from other receivables to contract assets

Contract assets have increased primarily in ALSA due to the recognition of infrastructure assets for public service vehicles where the concession grantor guarantees the contract performance in accordance with IFRIC 12 'Service Concession Arrangements'. Note 38 includes further details of the Group's service concession arrangements. In addition contract assets includes amounts in Germany that are expected to be settled after twelve months.

21 Inventories

	2020 £m	2019 £m
Raw materials and consumables	27.0	29.4

The movement on the provision for slow moving and obsolete inventory is immaterial.

22 Current assets – trade and other receivables

	2020 £m	2019 ¹ £m
Trade receivables	157.8	221.4
Grant receivables	71.4	23.5
Contract assets	80.8	104.0
Amounts due from associates and joint ventures (note 37)	3.6	3.4
Amounts due from other related parties (note 37)	1.3	0.4
Trade and grant receivables and contract assets	314.9	352.7
Less: provision for impairment of receivables	(46.3)	(36.4)
Trade and grant receivables and contract assets – net (note 30)	268.6	316.3
Other receivables	76.0	116.8
Prepayments	46.7	53.4
Accrued income	0.4	10.3
	391.7	496.8

¹ Prior year trade and other receivable balances have been represented with £1.7m reclassified from other receivables to contract assets

The timing of revenue recognition, billings and cash collection results in trade receivables (billed amounts), contract assets (unbilled amounts) and customer advances and deposits (contract liabilities – note 24) on the Group's Balance Sheet. Contract assets have primarily decreased in Germany consistent with the expectation that amounts will be settled after twelve months, with the balance now recorded in non-current trade and other receivables.

Trade receivables excludes £33.3m (2019: £49.0m) that was subject to factoring arrangements without recourse and for which no customer payment had been received at year end.

During the prior year, the Group entered into an asset exchange transaction in the UK, in which it swapped an existing property for a new piece of land and a funding arrangement to construct a new property. The funding of the new property was contingent on planning permission being received, about which there was no certainty and therefore consideration was constrained to the fair value of the new piece of land. At 31 December 2020, the Group has assessed that planning permission is highly probable and as a result recognised a receivable (included in other receivables) of £12.5m representing the funding due to the Group for construction of the new property. As construction of the property takes place and the Group is reimbursed, the receivable will unwind and a new property asset will be recognised in property, plant and equipment. A £7.7m gain on disposal was recognised in the Income Statement during the year, with no further amounts expected in future years.

The Directors consider that the carrying amount of trade and other receivables is approximately equal to their fair value.

Information about the credit risk exposure of the Group's trade receivables is shown in note 30.

23 Cash and cash equivalents

	2020 £m	2019 £m
Cash at bank and in hand	131.9	111.2
Overnight deposits	49.7	2.1
Other short-term deposits	338.9	365.0
Cash and cash equivalents	520.5	478.3

Included within cash and cash equivalents are certain amounts which are subject to contractual or regulatory restrictions. These amounts held are not readily available for other purposes within the Group and total £18.2m.

Additionally, in some countries where the Group operates, whilst the cash held is not restricted, repatriation of cash would be subject to withholding tax. The maximum withholding tax payable would amount to £6.3m if all of the cash held were to be repatriated.

Cash at bank and in hand earns interest at floating rates based on daily bank deposit rates.

Short-term deposits are made for varying periods of between one day and three months depending on the immediate cash requirements of the Group and earn interest at the agreed short-term floating deposit rate. The fair value of cash and cash equivalents is equal to the carrying value.

24 Current liabilities – trade and other payables

	2020 £m	2019 ¹ £m
Trade payables	231.2	329.7
Contract liabilities	25.9	16.5
Amounts owed to associates and joint ventures (note 37)	0.7	1.3
Amounts owed to other related parties (note 37)	1.5	0.6
Other tax and social security payable	33.5	32.2
Accruals and deferred income	236.3	304.4
Other payables	314.7	371.8
Put liability	17.5	–
	861.3	1,056.5

¹ Contract liabilities in the prior year have been represented to reclassify IFRIC 12 liabilities of £3.6m from current borrowings, see note 2 for further information

Trade payables are normally settled on 30 to 60 day terms and other payables have an average term of four months.

Contract liabilities represents amounts advanced by customers where the Group has not yet met the performance obligation to allow the recognition of the balance as revenue. These mainly relate to season ticket and advance ticket sales which cross over the year end date and are expected to be recognised as revenue in the year to 31 December 2021 or payments receipted on account. Contract liabilities have primarily increased year-on-year in Germany, due to payments on account having been receipted prior to completion of our performance obligations.

Other payables includes £204.0m (2019: £263.3m) for the purchase of property, plant and equipment. The Group settles these amounts in accordance with the supplier's standard payment terms, typically one year.

Other payables also includes deferred fixed asset grants from government or other public bodies of £1.6m (2019: £1.1m), advance payments for factoring of divisional revenues of £78.3m (2019: £58.1m) and £15.8m (2019: £36.1m) of deferred contingent consideration for businesses acquired, of which £2.5m (2019: £0.9m) relates to businesses acquired in the year (note 19).

25 Other non-current liabilities

	2020 £m	2019 ¹ £m
Deferred fixed asset grants	27.1	33.9
Contract liabilities	24.2	32.1
Other payables	105.9	15.4
Put liability	45.5	96.8
	202.7	178.2

¹ Contract liabilities in the prior year have been represented to reclassify IFRIC 12 liabilities of £13.9m from non-current borrowings, see note 2 for further information

25 Other non-current liabilities continued

Other payables includes £13.0m (2019: £12.9m) of deferred contingent consideration for businesses acquired, of which £5.0m (2019: £9.7m) relates to businesses acquired in the year (note 19) and £85.6m for the purchase of property, plant and equipment where standard payment terms are 18 months.

The put liability has been derived from an internal valuation, using forecast earnings over the exercise period (consistent with the base case projections used for going concern) and discounted at a rate of 0.6%. The first tranche of options, over 10% of the equity of WeDriveU, has been exercised by the vendors as at 31 December 2020 and will be settled during 2021. This element of the liability has been recorded in current liabilities (note 24). The put liability assumes that all of the remaining options (totalling 30% of the equity of WeDriveU) will be exercised at the final opportunity, being 31 December 2022. The table below shows on an indicative basis the Income Statement and Balance Sheet sensitivity of the put liability to reasonably possible changes in key assumptions. The sensitivity analysis below is based on a change in assumption while holding all other assumptions constant.

Increase/(decrease) in put liability and loss/(gain) in Income Statement	2020 £m
20% increase in EBITDA	9.7
20% decrease in EBITDA	(9.7)
0.5% increase in discount rate	(0.4)
0.5% decrease in discount rate	0.5
Timing of exercise (December 2021 – 10%; December 2022 – 20%)	(3.8)

Whilst the Group's long term expectations of WeDriveU are unchanged, the short term earnings projections for the business have been adjusted for the disruption due to the Covid-19 pandemic. This resulted in a £33.9m reduction in the carrying value of the put liability. See note 5 for further details.

26 Provisions

	Claims provision £m	Onerous contract provisions	Other £m	Total £m
At 1 January 2020	93.7	–	10.4	104.1
Charged to the Income Statement	33.0	103.6	6.0	142.6
Amounts settled through insurers	(12.6)	–	–	(12.6)
Utilised in the year	(33.0)	(64.8)	–	(97.8)
Unwinding of discount	1.6	–	–	1.6
Acquired in business combinations	–	–	0.6	0.6
Exchange difference	(2.0)	(0.8)	0.2	(2.6)
At 31 December 2020	80.7	38.0	17.2	135.9
Current 31 December 2020	40.7	28.7	11.7	81.1
Non-current 31 December 2020	40.0	9.3	5.5	54.8
	80.7	38.0	17.2	135.9
Current 31 December 2019	52.9	–	8.1	61.0
Non-current 31 December 2019	40.8	–	2.3	43.1
	93.7	–	10.4	104.1

The claims provision arises from estimated exposures at the year end for auto and general liability, workers' compensation and environmental claims, the majority of which will be utilised in the next five years. It also includes provision for employee compensation claims as disclosed in note 5. It comprises provisions for claims arising in the UK and North America.

Onerous contract provisions relate to loss making contracts in ALSA, North America and UK, all of which are expected to be utilised within the next two years. Onerous contract provisions are considered to be a new significant estimate in the year, particularly in relation to the extent to which the Covid-19 pandemic has a lasting effect on passenger revenue. A 10% decrease in revenues, whilst holding all other assumptions flat, would have increased the Income Statement charge by £34.1m in the year and resulted in a £33.1m increase to the closing Balance Sheet position.

Other primarily relates to a provision for a potential reclaim of subsidies in ALSA, all of which is expected to be utilised within the next 12 months.

When the effect is material, the provisions are discounted to their net present value.

27 Deferred tax

	2020 £m	2019 £m
At 1 January	(24.6)	(20.3)
Change in accounting policies ¹	–	2.9
At 1 January (restated)	(24.6)	(17.4)
Credit/(charge) to the Income Statement (note 11)	117.9	(17.6)
Credit/(charge) to Other Comprehensive Income or Equity	15.0	(6.3)
Exchange differences	(6.7)	4.2
Acquired in business combinations	(2.1)	12.5
Disposed in business combinations	0.3	–
Net deferred tax asset/(liability) at 31 December	99.8	(24.6)

¹ Opening balances in 2019 have been restated for the adoption of IFRS 16 'Leases'

Based on current capital investment plans, the Group expects to be able to claim capital allowances in excess of depreciation in future years at a similar level to the current year.

Deferred tax assets	2020 £m	2019 £m
Accelerated tax depreciation	(112.7)	(89.4)
Losses carried forward	202.8	126.4
Pensions	24.9	14.6
Other short-term temporary differences	25.5	(19.8)
	140.5	31.8

Deferred tax liabilities	2020 £m	2019 ¹ £m
Accelerated tax depreciation	(82.3)	(143.5)
Losses carried forward	22.8	3.9
Intangibles and deductible goodwill	8.2	46.3
Taxation credits	2.0	1.6
Other short-term temporary differences	8.6	35.3
	(40.7)	(56.4)

¹ Prior year balances were represented to correctly reflect the nature of the deferred tax liability

The UK, US and German businesses are included in deferred tax assets of £140.5m and the Spanish and Canadian businesses are included in deferred tax liabilities of £40.7m.

The deferred tax assets relating to losses carried forward are £225.6m (2019: £130.3m). This comprises £202.8m (2019: £126.4m) within deferred tax assets and £22.8m (2019: £3.9m) within deferred tax liabilities.

The Group has recognised deferred tax assets across the UK, US, Spanish and German businesses amounting to £294.8m (2019: £228.1m) that are considered to be able to be offset against the Group's future taxable profits. Management has based its assessment on the latest forecast budget approved by the Board which reflects improved trading performance across all divisions largely due to the expansion of the business.

28 Borrowings and derivative financial liabilities

	2020 £m	2019 ¹ £m
Non-current		
Bank loans	20.4	82.1
Bonds	647.0	644.8

¹ Lease liabilities has been represented to reclassify IFRIC 12 liabilities of £17.5m from borrowings to trade and other payables, see note 2 for further information

The Group currently has £782.0m of unsecured committed revolving credit facilities, of which £287.0m matures in 2021, £15.0m matures in 2024 and £480.0m matures in 2025. At 31 December 2020, there was £nil (2019: £nil) drawn down on the facilities, with £2.4m of capitalised deal fees remaining, which are classified within other receivables. In addition, £600.0m is available to be drawn on the Bank of England Corporate Covid Financing Facility (CCFF), which matures in March 2021.

Details of the Group's interest rate risk management strategy and associated interest rate derivatives are included in notes 30 and 31.

The Group is subject to a number of financial covenants in relation to its syndicated credit facilities which, if contravened, could result in its borrowings under those facilities becoming immediately repayable. These covenants specify maximum net debt to EBITDA and minimum EBITDA to net interest payable. In the light of the impact of the pandemic on EBITDA generation, the Group has renegotiated its covenants during 2020. The gearing covenant has been waived by the lenders for the 30 June 2021 and 31 December 2021 periods, and the interest cover covenant has been amended to 1.5x and 2.5x for the 30 June 2021 and 31 December 2021 periods respectively.

29 Interest-bearing borrowings continued

The following table sets out the carrying amount, by maturity, of the Group's interest-bearing borrowings and deposits:

As at 31 December 2020	< 1 year £m	1-2 years £m	2-3 years £m	3-4 years £m	4-5 years £m	> 5 years £m	Total £m
Fixed rate

30 Financial risk management objectives and policies

Financial risk factors and management

The Group is exposed to risks relating to fuel prices, foreign currency exchange rates, interest rates and the availability of funding at reasonable margins. The Group has in place a risk management programme that seeks to manage the impact of these risks on the financial performance of the Group by using financial instruments including borrowings, committed facilities and forward foreign exchange, fuel and interest rate derivatives.

The Board of Directors has delegated the responsibility for implementing the financial risk management policies laid down by the Board to the Group Finance Director and the Group Treasurer. The policies are implemented by the Group Treasury department with regular reporting to the Group Finance Director and the Audit Committee on its activities.

Foreign currency

The Group has major foreign operations in the USA, Canada, Spain and Morocco and as a result is exposed to the movements in foreign currency exchange rates on the translation of these foreign currency denominated net assets.

The Group seeks to reduce this foreign currency exchange movement risk by using a combination of foreign currency borrowings and entering into derivative financial instruments such as cross currency interest rate swaps and foreign exchange forward contracts.

At the year end, the Group had outstanding foreign exchange derivatives for net investment purposes of USD 522.2m and CAD 46.2m, and cross currency interest rate swaps of €222.7m. These foreign exchange forward contracts and cross currency interest rate swaps are derivative financial instruments designated as net investment hedges of foreign currency assets. The effective portion of the gain or loss on the hedge is recognised in the Group Statement of Comprehensive Income and recycled to the Income Statement at the same time as the underlying hedged net assets affect the Income Statement. Any material ineffectiveness is taken to the Income Statement.

30 Financial risk management objectives and policies continued

The Group expects changes in value of both the hedging instrument and the hedged net investment to offset and systematically move in opposite directions and that there will be a 1:1 hedge ratio, given that the critical terms are closely aligned.

The Group applies the 'forward rate method' under IFRS 9 such that the effective portion of changes in fair value of forward points are retained in Other Comprehensive Income. The currency basis is excluded from the hedging instrument, and the actual currency basis on inception of the trade is treated as the 'cost of hedging' and recognised in profit or loss over the life of the hedging relationship on a straight-line basis. Any changes in the currency basis since inception will be deferred into a separate component of Other Comprehensive Income.

In these hedge relationships, the main source of ineffectiveness is movements in the Group's or the derivative counterparty's credit spread resulting in fair value movements in the hedging instrument that are not reflected in the fair value movements of the hedged net investment.

The table below demonstrates the sensitivity of the Group's financial instruments to a reasonably possible change in foreign exchange rates, with all other variables held constant. This would affect the Group's profit before tax and translation reserve. The effect on the translation reserve represents the movement in the translated value of the foreign currency denominated loans and change in fair value of the derivative contracts. These movements would be offset by an opposite movement in the translated value of the related portion of the Group's overseas net investments. It is estimated that a 10% change in the corresponding exchange rates would result in an exchange gain or loss in the translation reserve of £35.6m (2019: £41.2m).

	Strengthening/ (weakening) in currency	2020		2019	
		Effect on (loss)/profit before tax £m	Effect on translation reserve £m	Effect on profit before tax £m	Effect on translation reserve £m
As at 31 December					
US Dollar	10%	-	(28.5)	-	(33.7)
Euro	10%	-	(4.7)	-	(5.1)
Canadian Dollar	10%	-	(2.4)	-	(2.4)
US Dollar	(10)%	-	28.5	-	33.7
Euro	(10)%	-	4.7	-	5.1
Canadian Dollar	(10)%	-	2.4	-	2.4

Interest rate risk

The Group is exposed to movements in interest rates on both interest-bearing assets and liabilities. It is the Group's policy to maintain an appropriate balance between fixed and floating interest rates on borrowings in order to provide a level of certainty to interest expense in the short term and to reduce the year-on-year impact of interest rate fluctuations over the medium term. To achieve the desired fixed:floating ratio, the Group has entered into a series of interest rate swaps that have the effect of converting fixed rate debt to floating rate debt. The net effect of these transactions was that as at 31 December 2020, the proportion of the Group's gross debt at floating rates was 7% (2019: 24%), with the reduction reflecting the repayment of floating rate borrowings during the year and the drawdown of the US private placement at fixed long-term rates.

The Group expects changes in value of both the hedging instrument and the hedged transaction to offset and systematically move in opposite directions and that there will be a 1:1 hedge ratio, given that the critical terms are closely aligned.

In these hedge relationships, the main sources of ineffectiveness are:

- movement in the Group's and the derivative counterparty's credit spread, resulting in fair value movements in the hedging instrument that are not reflected in fair value movements in the hedged transaction; and
- any changes in the critical terms of the hedged transaction such that they no longer match those of the hedging instrument.

The table below demonstrates the sensitivity of the Group's financial instruments to a reasonably possible change in interest rates, with all other variables held constant, on the Group's profit before tax and on the Group's hedging reserve.

The sensitivity analysis covers all floating rate financial instruments, including the interest rate swaps. If the interest rates applicable to floating rate instruments were increased by 100 basis points it is estimated that the Group's profit before taxation would decrease by approximately £0.4m relating to the Euro. The analysis assumes that the amount and mix of floating rate debt, including finance leases, remains unchanged from that in place at 31 December 2020.

30 Financial risk management objectives and policies continued

Sterling	(100)	0.4	-	0.7	-
US Dollar	(100)	-	-	2.2	-
Euro	(100)	-	-	1.4	-

Commodity prices

The Group is exposed to movements in commodity prices as a result of its fuel usage. The Group's policy is to provide protection against sudden and significant increases in fuel prices, thus mitigating volatility in both cash and the Income Statement in the short to medium term. In order to manage the risk exposure, the Group enters into fuel derivatives to hedge 100% of estimated fuel requirements across all divisions for the next 15 months, and additionally to hedge at least 50% of the estimated fuel requirements in the Spain and North America divisions 15-24 months into the future.

Due to the impact of the Covid-19 pandemic, the uncertainty of future exposures and to mitigate the risk of further over-hedging, fuel hedge activity was only continued for periods relating to the 2022 financial year onwards.

Furthermore, during the year hedge accounting was discontinued for a number of fuel derivatives where volumes were in excess of actual or expected consumption due to the pandemic. This applied to certain derivatives maturing in both 2020 and 2021. Further information relating to this is given in note 31. In each case, offsetting trades were placed in respect of the over hedged volume and with the same maturity date as the original trade. The offsetting trades are not hedge accounted, and will continue to offset gains or losses on the discontinued trades in the Income Statement until they mature. Whilst there is the potential for further over-hedges in 2021, the impact on the Income Statement is not expected to be material.

At 31 December 2020, the Group had hedged approximately 95% of its 2021 expected usage, 52% of its expected usage in 2022 and 15% of its expected usage in 2023.

Risk component hedging has been adopted under IFRS 9, such that the hedged price risk component of the purchased fuel matches that of the underlying derivative commodity. The hedged risk component, being the commodity index of each location where fuel is purchased, is considered to be separately identifiable and reliably measurable. The use of commodity derivatives to hedge the fuel exposure is expected to result in a 1:1 hedge ratio as the notional value of the hedging instrument is consistent with the designated amount of the underlying exposure. In these hedge relationships, the main source of ineffectiveness is changes in the actual settlement date and/or settlement amount.

Fuel derivatives are designated as cash flow hedges, with the effective portion of changes in fair value of the hedging instrument being recorded within a separate component of equity, and recycled to the Income Statement as the hedged item impacts the Income Statement.

The table below demonstrates the effect of a reasonably possible variation in fuel prices, with all other variables held constant, on the fair value of the Group's financial instruments and accordingly on the Group's (loss)/profit before tax and the Group's hedging reserve.

The sensitivity analysis includes all fuel derivatives. The effect on the hedging reserve arises through movements on the fair value of the Group's fuel derivatives which remain effective cash flow hedges. For these derivative contracts the sensitivity of the net fair value to an immediate 10% increase or decrease in all prices would have been £9.5m at 31 December 2020 (2019: £13.5m). The figure does not include any corresponding economic advantage or disadvantage that would arise from the natural business exposure which would be expected to offset the gain or loss on the derivatives. As noted above, movements in fair value of fuel derivatives which are not hedge accounted should equally offset within the Income Statement and hence have no impact on (loss)/profit before tax.

30 Financial risk management objectives and policies continued

Credit risk

(i) Risk management

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

Credit risk is managed by a combination of Group Treasury and divisional management, and arises from cash and cash equivalents, derivative financial instruments and credit exposures to amounts due from outstanding receivables and committed transactions. The maximum credit risk exposure of the Group is the gross carrying value of each of its financial assets which comprises trade and other receivables of £312.4m (2019: £377.5m), cash and cash equivalents of £520.5m (2019: £478.3m), finance lease receivables of £14.9m (2019: £5.0m), investments of £12.9m (2019: £14.2m) and derivative financial instruments of £46.3m (2019: £55.2m).

Credit risk is primarily attributable to trade and other receivables and is mitigated by a number of factors. Many of the Group's principal customers, suppliers and financial institutions with which it conducts business are local public (or quasi-public) bodies, including school boards in North America, municipal authorities in Spain and Morocco and the West Midlands Combined Authority in the UK, and regional authorities in Germany. The Group does not consider these counterparties to pose a significant credit risk. This has been evident throughout the Covid-19 pandemic, as these counterparties have continued to pay us. Outside of this, the Group does not consider it has significant concentrations of credit risk. The Group is monitoring the economic environment in response to the Covid-19 pandemic and is taking actions to limit its exposure to customers that are severely impacted. As a minimum, the Group has implemented policies that require appropriate credit checks on potential customers before sales commence.

Cash and cash equivalents and derivative financial instruments are held with counterparties with a minimum of BBB- credit rating assigned by international credit rating agencies. The Group Treasury Committee continually assesses the credit risk of each counterparty, including monitoring credit ratings and tier 1 capital of each counterparty. Additionally, Group policy allows a maximum exposure of £75.0m per counterparty.

(ii) Impairment of financial assets

The Group applies the IFRS 9 simplified approach to measuring expected credit losses for all trade receivables (including grant receivables and contract assets) at each reporting date. Provision matrices are used to measure expected losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns, such as geographical region, service type, and customer type and rating. The calculation reflects the probability-weighted outcome and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. The characteristics used to determine the groupings of customer segments are those that have the greatest impact on the likelihood of default. Given the diversity of characteristics of different customer segments, the Group applies different definitions of default for different groups of customers. The risk of default increases once the receivable is past due and increases in 30 day increments.

The Covid-19 pandemic has not given rise to a significant increase in the impairment of trade receivables. The majority of the Group's customers are governmental or similar bodies and hence there are not considered to be any issues with the recoverability of these receivables. Further there have not been any significant issues with the recoverability of non-governmental receivables. Consequently the increase in the loss allowance recognised in the Income Statement in the year of £10.7m (2019: £8.1m) is materially consistent with the prior year.

30 Financial risk management objectives and policies continued

The table below shows the credit risk exposure on the Group's trade receivables as at 31 December 2020:

	Carrying amount £m	Current £m	Days past due			
			Less than 30 days £m	Between 30 and 60 days £m	Between 61 and 90 days £m	Over 90 days £m
31 December 2020						
Expected loss rate	11.6%	0.8%	4.9%	2.9%	22.2%	25.7%
Gross carrying amount – trade and grant receivables and contract assets (current and non-current)	400.1	199.5	20.6	10.3	4.5	165.2
Loss allowance	46.3	1.5	1.0	0.3	1.0	42.5
			Days past due			
	Carrying amount £m	Current £m	Less than 30 days £m	Between 30 and 60 days £m	Between 61 and 90 days £m	Over 90 days £m
31 December 2019 ¹						
Expected loss rate	10.1%	0.8%	3.5%	4.2%	14.5%	29.6%
Gross carrying amount – trade and grant receivables and contract assets (current and non-current)	358.7	193.7	39.6	9.6	8.3	107.5
Loss allowance	36.4	1.6	1.4	0.4	1.2	31.8

¹ Prior year comparatives were represented for the reclassification of contract assets consistent with notes 20 and 22 and the ageing of contract assets in Germany.

Trade receivables over 90 days primarily comprises amounts due from public authorities in ALSA and German Rail, along with receivables for school bus services in North America where amounts are settled on approval from the local governing bodies at the end of the school period. A loss provision of £42.5m (2019: £31.8m) is in place against these receivables. Given that these are predominantly ongoing contractual relationships and with public bodies, the Directors believe that the remaining amounts will be collected.

The closing loss allowance for trade receivables as at 31 December 2020 reconciles to the opening loss allowance as follows:

	2020 £m	2019 £m
At 1 January	(36.4)	(29.4)
Increase in loss allowance recognised in Income Statement during the year	(10.7)	(8.1)
Utilised in the year	1.8	3.4
Arising on acquisitions	(0.2)	(3.9)
Exchange difference	(0.8)	1.6
At 31 December	(46.3)	(36.4)

Trade receivables are written off when there is no reasonable expectation of recovery.

Impairment losses on trade receivables are presented as net impairment losses within operating profit or loss. Subsequent recoveries of amounts previously written off are credited against the same item.

Impairment provisions in respect of cash and cash equivalents and finance lease receivables are also subject to the requirements of IFRS 9. As our cash and cash equivalents are held with counterparties with a minimum of BBB- credit rating, no impairment loss was identified at the reporting date. Similarly no impairment loss was identified in relation to finance lease receivables.

Liquidity risk

Liquidity risk is the risk that the Group, although solvent, will have difficulty in meeting its obligations associated with its financial liabilities as they fall due.

Funding for the Group is coordinated centrally by the treasury function and with the Group's forecast funding requirements and its debt facilities being reported to and monitored on an ongoing basis by the treasury function and formally via the monthly Treasury Committee. The level of facilities is maintained such that facilities and term loans exceed the forecast peak gross debt of the Group over a rolling 12-month view, with minimum headroom maintained, taking into account market conditions and corporate activity, including acquisitions and organic growth plans. The minimum funding headroom assumes that factoring facilities are not available.

30 Financial risk management objectives and policies continued

As a consequence of the Covid-19 pandemic the Group undertook the swift and decisive decision to raise over £1.5 billion in cash since the beginning of the pandemic, from a diversified range of funding sources including debt and equity as follows:

- In April 2020 the Group secured a commitment for £600m through the Bank of England Covid Corporate Financing Facility ("CCFF"), of which only £300m was initially issued. This was subsequently repaid in December 2020, with the £600m total facility available to utilise until March 2021;
- In April 2020 the Group secured two additional committed facilities totalling £188m, which remain undrawn at December 2020 and mature in 2021;
- In May 2020 the Group raised proceeds of £230.1m through an equity share issue; and
- In November 2020, the Group issued a £500m sterling denominated hybrid instrument, realising net proceeds of £495.5m.

Short-term funding requirements are met through use of cash & cash equivalents and drawings under unsecured committed revolving credit facilities if required. Most of the Group's cash is held in the UK, US and Spain, although some is held in countries where repatriation is restricted and transferring cash back to the Group would be subject to withholding tax (see note 23).

The Group currently has £782.0m of unsecured committed revolving credit facilities, which mature between 2021 and 2025. At 31 December 2020 there was £nil (2019: £nil) drawn down on the facilities. The maximum draw down of the revolving credit facility during the year was £110.0m (2019: £314.7m), with the lower drawdowns in 2020 as a result of the additional liquidity secured as detailed above.

Medium and long-term funding requirements are met through committed debt facilities as detailed in note 29.

As described in note 29, the Group secured waivers or amendments from its key covenant tests for the 2020 and 2021 testing periods. In return for these waivers and amendments and Group agreed to a quarterly £250m minimum liquidity test (up to and including Q1 2022) and a £1.6bn maximum net debt test as at 30 June and 31 December 2021, both on a pre-IFRS 16 basis. Including the £600m Bank of England CCFF, as at 31 December 2020 the Group had over £1.9bn of cash and undrawn facilities, of which £0.8bn matures in Q1 2021, and therefore continues to have significant headroom on the minimum liquidity test.

The table below summarises the maturity profile of the Group's financial liabilities at 31 December 2020 based on the contractual undiscounted cash flows including interest cash flows. As such, the amounts in this table will not agree to the carrying amounts disclosed in the Balance Sheet or other notes. The table includes cash flows associated with derivative hedging instruments. Their amounts reflect the maturity profile of the fair value liability where the instrument will be settled net, and the gross settlement amount where the pay leg of a derivative will be settled separately to the receive leg.

Year ended 31 December 2020	Carrying amounts £m	Contractual cash flows £m	< 1 year £m	1-2 years £m	2-3 years £m	3-5 years £m	> 5 years £m

Capital risk management

The objective of capital management is to ensure that the Group is able to continue as a going concern whilst delivering shareholder expectations of a strong capital base as well as returning benefits for other stakeholders.

The Group's capital structure consists of equity (refer to the Group Statement of Changes in Equity) and net debt (refer to note 39).

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group's debt is monitored on the basis of a gearing ratio, being net debt divided by EBITDA, further details of which are provided in the Group Finance Director's review.

As a consequence of Covid-19 the Group has made two significant adjustments to its capital structure. In May, the Group transacted a share issue through an equity placing and raised £230.1m net of fees and in November the Group issued a £500m sterling denominated hybrid instrument and raised a further £495.5m net of fees. Both measures have strengthened the Group's Balance Sheet.

The Group also uses return on capital employed 'ROCE' as a measure of its ability to drive better returns on the capital invested in the Group's operations, further details of which are provided in the Group Finance Director's review.

31 Financial instruments (including cash, trade receivables and payables)

Fair values

Financial assets at amortised cost are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and include trade and other receivables and cash and cash equivalents. After initial fair value recognition, they are measured at amortised cost using the effective interest rate method. The fair value of these instruments approximates their carrying amounts largely due to the short-term maturities.

Financial assets at fair value through other comprehensive income relates to the Group's non-listed equity investments.

The Group's derivatives are measured at fair value. Derivatives, other than those designated as effective hedging instruments, are classified as fair value through profit or loss and are carried on the Balance Sheet at their fair value with gains or losses recognised in the Income Statement. Derivatives designated as hedging instruments in an effective hedge are carried on the Balance Sheet at their fair value. For cash flow hedges and hedges of net investments in foreign operations, the effective portion of the gain or loss on the hedging instrument is recognised directly in Other Comprehensive Income, while the ineffective portion is recognised in the Income Statement.

31 Financial instruments (including cash, trade receivables and payables) continued

Amounts taken to Other Comprehensive Income are transferred to the Income Statement when the hedged transaction affects profit or loss or when the foreign operation is sold or partially disposed of. For fair value hedges, all gains or losses are recognised in the Income Statement.

The fair value measurement of derivative instruments is categorised within Level 2 (i.e. the fair values are derived based on observable market inputs). The Group has no financial instruments with fair values that are determined by reference to significant unobservable inputs, i.e. those that would be classified as Level 3 in the fair value hierarchy, other than the deferred contingent consideration disclosed in note 19 and financial assets at fair value through other comprehensive income in note 17. There have not been any transfers of assets or liabilities between levels of the fair value hierarchy and there are no non-recurring fair value movements.

All liabilities, including bonds, private placements, leases, bank loans and trade and other payables (excluding contingent consideration) are held at amortised cost. After initial fair value recognition, these instruments are measured at amortised cost using the effective interest rate method. The carrying value of these liabilities approximates to the fair value.

The following table below illustrates the fair values of all financial assets and liabilities held by the Group at 31 December 2020:

Classification of financial instruments As at 31 December 2020	Assets and liabilities at amortised cost £m	At fair value through other comprehensive income £m	At fair value through profit or loss £m	Derivatives used for hedging £m	Total £m

¹ Lease liabilities has been represented to reclassify IFRIC 12 liabilities of £17.5m from borrowings to trade and other payables, see note 2 for further information

² Trade and other payables in the prior year have been represented to correct the presentation of contingent consideration, which is valued at fair value through profit or loss

Other receivables and other payables are to be settled in cash in the currency they are held in.

The Group assesses at each year end reporting date whether a financial asset or group of financial assets is impaired. In the financial year 2020, there was no objective evidence that would have necessitated the impairment of loans and receivables or available-for-sale assets except the provision for impairment of receivables (see note 30).

Embedded derivatives

In accordance with IFRS 9 'Financial Instruments', the Group has reviewed its contracts for embedded derivatives that are required to be separately accounted for. No embedded derivatives have been identified.

Hedging activities

The Group uses derivative financial instruments to manage exposures to market risk, such as movements in foreign exchange rates, fuel prices and interest rates. Such derivative financial instruments are initially recognised at fair value and are subsequently re-measured at fair value at the end of each reporting period. In line with IFRS 9 the Group classifies hedges as; (i) fair value hedges used to hedge exposure to changes in the fair value of a recognised asset or liability, (ii) cash flow hedges used to hedge exposure to variability in cash flows associated with a recognised asset or liability or a highly probable forecast transaction, and (iii) hedges of a net investment in a foreign operation.

In 2020, the Group applied cash flow hedge accounting to hedge fuel price risk, to hedge net investments in its North American and European foreign operations, and to hedge interest rate risk on certain bank loans until maturity. The Group also applied fair value hedge accounting on £100.0m of the Group's fixed rate bonds until maturity in June 2020 and €78.5m private placement to hedge changes in fair value due to interest rate fluctuations.

31 Financial instruments (including cash, trade receivables and payables) continued

The movement on derivative financial instruments is detailed below:

	At fair value through profit and loss			Derivatives used for hedging				Total £m

¹ Represents the carrying value of the €318.5m Euro denominated private placements

² Inclusive of cash settlements for the period

Hedge of net investments in foreign entities

The Group uses foreign currency borrowings and derivative financial instruments to hedge the net investment in material foreign currency net assets of the Group, which are used to reduce the exposure to foreign exchange rate movements. At 31 December 2020, the Group had designated €222.7m of cross currency interest rate swaps and €318.5m of Private Placements as net investment hedges of the net assets of the Group's European subsidiaries. Similarly, USD 522.2m and CAD 46.2m of foreign exchange forward contracts were designated as a hedge of the net assets of the Group's North America subsidiaries. No material ineffectiveness was recognised in relation to these hedges.

Fuel derivatives

The Group has a number of fuel derivatives in place to hedge the different types of fuel used in each division. Fuel swaps are used to match the timing, type of fuel and currency in which the domestic physical fuel is purchased as closely as possible, with hedges currently in place from 2021 through to 2023.

The Group applies relevant hedge accounting to the majority of its derivatives outstanding as at 31 December 2020. Hedge accounting was discontinued for a number of fuel derivatives maturing in 2020 and 2021 where volumes were in excess of actual or expected consumption due to Covid-19. As a result, accumulated fair value movements were recycled from Other Comprehensive Income to the Income Statement within separately disclosed items (see note 5).

To reduce the impact on the income statement from the date of discontinuation of hedge accounting to the date of maturity the Group entered into offsetting trades, for the equivalent volume and maturity date. These trades do not qualify for hedge accounting with fair value movements on the de-designated trades and the new offsetting trades going through the Income Statement. Collectively these trades have a fair value of a £2.4m liability on the Group Balance Sheet as at 31 December 2020.

31 Financial instruments (including cash, trade receivables and payables) continued

For the remaining trades where hedge accounting was applied, gains or losses on the derivatives continue to be recognised in equity and on settlement are recycled to the Income Statement against the respective operating expense, and are not included in separately disclosed items. During the year, £50.5m of fair value losses (2019: £18.6m losses) have been transferred to the hedging reserve due to movements in market fuel prices. A fair value loss of £29.5m (2019: £4.5m gain) has been transferred from the hedging reserve to the Income Statement following settlement of fuel trades, of which a £1.8m loss was in the hedging reserve at 1 January 2020 and the remainder was generated during the year due to movements in market fuel prices. These trades have a fair value of a £17.7m liability as at 31 December 2020.

No material ineffectiveness was recognised in relation to these hedges.

Fuel derivatives can be analysed as follows:

	31 December 2020	31 December 2019	31 December 2020	31 December 2019
	Fair value £m	Fair value £m	Volume million litres	Volume million litres
Fuel derivatives				
Sterling denominated – UK	(5.2)	2.4	55.4	68.4
Euro denominated – ALSA	(7.0)	0.9	84.0	83.9
US Dollar and Canadian Dollar denominated – North America	(4.4)	0.5	47.3	73.8
Fuel derivatives included in current assets/(liabilities)	(16.6)	3.8	186.7	226.1
Sterling denominated – UK	(0.8)	(0.7)	47.6	47.3
Euro denominated – ALSA	(2.2)	(0.7)	64.0	66.7
US Dollar and Canadian Dollar denominated – North America	(0.5)	(1.1)	54.7	56.3
Fuel derivatives included in non-current assets/(liabilities)	(3.5)	(2.5)	166.3	170.3
Total fuel derivatives	(20.1)	1.3	353.0	396.4

Interest rate swaps at fair value through profit or loss

In July 2010, the Group entered into two £50m interest rate swaps that pay floating interest (LIBOR + margin) semi-annually and receive fixed interest annually. These were designated as fair value hedges of interest rate risk with maturities matching the Group's £225m Sterling bonds maturing in June 2020. These swaps were measured at fair value through profit or loss, with any gains or losses being taken immediately to the Income Statement to offset any fair value gains or losses due to changes in the risk-free interest rate on the swapped portion of the bonds. A fair value loss of £0.8m was recognised in the Income Statement during the year in relation to these swaps. This was offset by a fair value gain of £0.8m on the underlying hedged item, being the change in fair value on £100m of the Group's £225m bond which matured in June 2020 due to changes in the risk-free interest rate.

In September 2012, the Group entered into two €39.25m denominated interest rate swaps equal in value to the Euro private placement. These interest rate swaps all pay floating interest (EURIBOR + margin) semi-annually, receive fixed interest semi-annually with maturities matching the Euro private placement maturing in August 2021 and are designated as a fair value hedge of the interest rate risk on the private placement. These swaps are measured at fair value through profit and loss, with any gains or losses being taken immediately to the Income Statement to offset any fair value gains or losses due to changes in the risk-free rate on the Euro private placement. A fair value loss of £1.4m was recognised in the Income Statement during the year in relation to these swaps. This was offset by a fair value gain of £1.4m on the underlying hedged item, in this case changes in fair value of the Euro Private Placement due to changes in the risk-free interest rate.

Cash flow hedges

In June 2020, the Group entered into an \$81m cross currency swap that pays fixed USD interest semi-annually and receives fixed GBP interest semi-annually. This is designated as a cash flow hedge of foreign currency risk with maturities matching an \$81m private placement maturing in June 2027. No material ineffectiveness was recognised during the year.

32 Called-up share capital

Issued called-up and fully paid:	No. of shares	£m
At 1 January 2019 and 31 December 2019	511,738,648	25.6
Issued during the year	102,347,729	5.1
At 31 December 2020	614,086,377	30.7

In May 2020, the Group issued 101,918,947 ordinary shares of 230p each. The net proceeds were £229.1m and as the share issue qualified for merger relief under Section 612 of the Companies Act 2006, the excess of the net proceeds over the nominal value of the shares issued has been credited to a merger reserve rather than the share premium account (see note 33). At the same time, the Group directly issued 428,782 ordinary shares of 230p each to members of the Board and executive management team. The net proceeds were £1.0m and the excess proceeds over the nominal value of the shares have been recorded in share premium.

The total number of share options exercised in the year by employees of the Group was 1,552,919 (2019: 1,825,123) of which all (2019: all) exercises were satisfied by transferring shares from the National Express Employee Benefit Trust.

Own shares

Own shares comprises 877,337 (2019: 1,404,751) ordinary shares in the Company that have been purchased by the trustees of the National Express Employee Benefit Trust (the Trust). During the year, the Trust purchased 1,025,505 (2019: 1,471,214) shares and 1,552,919 (2019: 1,825,123) shares were used to satisfy options granted under a number of the Company's share schemes. No shares (2019: nil) were sold during the year to the open market.

The market value of the shares held by the Trust at 31 December 2020 was £2.1m (2019: £6.6m). No dividends were payable on these shares in 2020. In 2019 dividends payable on 972,605 shares held by the Trust were waived.

33 Other reserves continued

The nature and purpose of the other reserves are as follows:

- The merger reserve included the premium on shares issued to satisfy the purchase of Prism Rail PLC in 2000 and the share issue during the year as described in note 32.
- The cash flow hedging reserve and net investment hedge reserve records the movements on designated hedging instruments, offset by any movements recognised in equity on underlying hedged items.
- The cost of hedging reserve records the movements in the currency basis, which are excluded from the hedging instrument on the designated hedging instruments in the cashflow and net investment hedge reserves.
- The translation reserve records exchange differences arising from the translation of the accounts of foreign currency denominated subsidiaries offset by the movements on loans and derivatives used to hedge the net investment in foreign subsidiaries and cost of hedging.
- The fair value reserve is for fair value movements on financial assets that are classified as fair value through other comprehensive income.

34 Pensions and other post-employment benefits

(a) Summary of pension benefits and assumptions

The UK division (UK) and National Express Group PLC (the Company) both operate defined benefit pension schemes.

The Group also provides certain additional unfunded post-employment benefits to employees in North America and maintains a small defined benefit scheme for National Express Services Limited. These post-employment benefits have been combined into the 'Other' category.

The UK, the Company and North America also operate or contribute into a number of defined contribution schemes.

For the Company defined benefit scheme, having completed a buy-in transaction in 2018, the defined benefit obligations are fully insured. Consequently the Company has no obligation to make any further payments into the scheme.

In 2020, the UK division agreed a new six-year annual deficit plan with the trustees of the West Midlands Integrated Transport Authority Pension Fund, which continues until March 2024 with an average contribution of £7.6m per annum. The plan remains open to accrual for existing members only.

The assets of the defined benefit schemes are held separately from those of the Group and contributions to the schemes are determined by independent professionally qualified actuaries.

The Group expects to contribute £7.7m into its defined benefit pension plans in 2021.

The total pension cost charged to underlying operating loss in the year for the Group was £11.2m (2019: £10.3m), of which £6.7m (2019: £6.4m) relates to the defined contribution schemes.

The defined benefit pension (liability)/asset included in the Balance Sheet is as follows:

	2020 £m	2019 £m
Company	12.3	14.2
Pension assets	12.3	14.2
UK	(141.6)	(99.1)
Other	(5.8)	(5.1)
Pension liabilities	(147.4)	(104.2)
Total	(135.1)	(90.0)

34 Pensions and other post-employment benefits continued

Through its defined benefit plans, the Group is exposed to a number of risks, the most significant of which relate to the UK and are detailed below. The Company scheme has a low level of risk due to the buy-in policy, whereby the present value of the scheme liabilities is fully matched by the fair value of the insurance asset.

Investment risk

The present values of scheme liabilities are calculated using a discount rate set with reference to corporate bond yields; if the return on scheme assets is below this yield, it will create a deficit. The UK scheme holds a significant proportion of return-seeking assets (equities and diversified growth funds) which, though expected to outperform corporate bonds in the long term, create volatility and risk in the short term.

Interest risk

A decrease in bond interest rates will increase scheme liabilities but this will be partially offset by an increase in the returns on the scheme assets.

Inflation risk

A significant proportion of the schemes' obligations are linked to inflation, and higher inflation will lead to higher liabilities. The Group has some inflation linking in its revenue streams, which helps to offset this risk. In addition, the UK scheme holds a small proportion of index-linked bonds which will help to protect against this risk.

Longevity risk

The majority of the obligations are to provide benefits for the life of the members, so increases in life expectancy will result in an increase in the liabilities. The UK scheme includes a buy-in policy covering part of the pensioner members' liabilities, which partly helps to mitigate longevity risk. The Company scheme is fully covered by a buy-in policy.

Legislative risk

Future legislative changes are uncertain. In the past these have led to both increases in obligations, for example, reduced investment return through the ability to reclaim Advance Corporation Tax, and decreases in obligations, for example, through the ability to use CPI inflation instead of RPI to set pension increase rates. For the UK scheme the Group receives professional advice on the impact of legislative changes.

The valuations conducted for financial reporting purposes are based on the triennial actuarial valuations. A summary of the latest triennial actuarial valuations for the principal schemes, and assumptions made, are as follows:

	UK	Company
	31 March 2019	5 April 2016
Date of actuarial valuation		
Rate of investment returns per annum	3.2%	0%-2.1%
Increase in earnings per annum	2.7%	–
Scheme assets taken at market value	£495.0m	£114.8m
Funding level	84%	97%

The most recent triennial valuations are then updated by independent professionally qualified actuaries for financial reporting purposes, in accordance with IAS 19. The main actuarial assumptions underlying the IAS 19 valuations as follows:

	2020		2019	
	UK	Company	UK	Company
Rate of increase in salaries	2.5%	–	2.5%	–
Rate of increase of pensions in payment	2.4%	2.9%	2.1%	2.9%
Discount rate	1.3%	1.4%	2.0%	2.1%
Inflation assumption (RPI)	3.0%	2.9%	3.0%	2.9%
Inflation assumption (CPI)	2.4%	2.3%	2.1%	2.0%
Post-retirement mortality in years:				
Current pensioners at 65 – male	19.9	22.4	19.8	22.3
Future pensioners at 65 – male	21.3	23.7	21.2	23.6
Current pensioners at 65 – female	23.2	25.1	23.0	24.9
Future pensioners at 65 – female	24.7	26.6	24.5	26.4

34 Pensions and other post-employment benefits continued

The demographic assumptions reflect those adopted in the most recent triennial actuarial valuation.

The Directors regard the assumptions around pensions in payment, discount rate, inflation and mortality to be the key assumptions in the IAS 19 valuation. The following table provides an approximate sensitivity analysis of a reasonably possible change to these assumptions:

	UK 2020 £m	Company 2020 £m	UK 2019 £m	Company 2019 £m
(Increase)/decrease in the defined benefit obligation				
Effect of a 0.5% increase in pensions in payment	(27.6)	–	(25.5)	–
Effect of a 0.5% increase in the discount rate	35.8	–	31.5	–
Effect of a 0.5% increase in inflation	(32.0)	–	(28.5)	–
Effect of a 1 year increase in mortality rates	(18.5)	–	(14.0)	–

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. Aside from the matching insurance contracts held in the UK and Company schemes, no allowance has been made for any change in assets that might arise under any of the scenarios set out above.

Scheme assets are stated at their market values at the respective balance sheet dates. The expected rate of return on scheme assets is determined based on market returns on each category of scheme assets.

(b) Financial results for pension benefits

The amounts charged to the Group Income Statement and Group Statement of Comprehensive Income for the years ended 31 December 2020 and 2019 are set out in the following tables:

	UK 2020 £m	Company 2020 £m	Other 2020 £m	Total 2020 £m
Group Income Statement				
Amounts (charged)/credited:				
Current service cost	(3.5)	–	–	(3.5)
Past service cost	–	(0.8)	–	(0.8)
Net interest (expense)/income	(1.8)	0.3	(0.2)	(1.7)
Total charge to Income Statement	(5.3)	(0.5)	(0.2)	(6.0)

In addition, during the year £1.0m (2019: £0.6m) of administrative expenses were incurred.

The past service cost in the Company relates to Guaranteed Minimum Pension (GMP) equalisation. In October 2018 the High Court ruled that GMP should be equalised between men and women. Whilst in 2018 the Group equalised benefits for existing members, a further High Court ruling in November 2020 provided further detail and this resulted in a further charge with respect to members who have transferred out of the scheme in prior years.

The net interest expense has been included within finance costs (see note 10).

Actuarial gain/(loss) during the period from obligations	16.3	(11.5)	(0.6)	4.2
Expected return on plan assets less than discount rate	8.9	10.8	0.2	19.9
Net actuarial gain/(loss)	25.2	(0.7)	(0.4)	24.1

In addition to the above actuarial movements, the Statement of Comprehensive included a £0.6m loss for investment advice that was incurred directly by the Company, primarily in relation to the buy-in transaction.

The amounts were recognised in the Balance Sheet at 31 December as follows:

	UK 2020 £m	Company 2020 £m	Other 2020 £m	Total 2020 £m
As at 31 December 2020				
Equities	83.1	–	2.2	85.3
Bonds and multi-asset credit	87.9	–	0.9	88.8
Insurance policy	196.7	109.0	–	305.7
Diversified growth fund	106.9	–	–	106.9
Other	0.5	13.8	0.1	14.4
Fair value of scheme assets	475.1	122.8	3.2	601.1
Present value of liabilities and defined benefit obligation	(616.7)	(110.5)	(9.0)	(736.2)
Defined benefit pension (deficit)/surplus	(141.6)	12.3	(5.8)	(135.1)

None of the pension arrangements directly invest in any of the Group's own financial instruments nor any property occupied by, or other assets used by, the Group. The majority of the benefits within the plans are covered by insurance contracts. The insurance assets have been valued so as to match the defined benefit obligations. The fair value of the remainder equity and debt instruments have primarily been determined based on quoted prices in active markets.

	UK 2019 £m	Company 2019 £m	Other 2019 £m	Total 2019 £m
As at 31 December 2019				
Equities	75.1	–	2.1	77.2

Defined benefit pension (deficit)/surplus	(99.1)	14.2	(5.1)	(90.0)

The movement in the present value of the defined benefit obligation in the year is as stated overleaf.

The Group's defined benefit obligation comprises £732.3m (2019: £656.5m) arising from plans that are wholly or partly funded and £3.9m (2019: £3.8m) from unfunded plans.

Based on the terms and conditions of the Company scheme, and from consultation with independent advisers, the Group determined that an ultimate future economic benefit exists in the form of a refund or a reduction in future contributions. Therefore, in accordance with IFRIC 14, the closing defined benefit surplus of this scheme has been recognised.

34 Pensions and other post-employment benefits continued

The movement in the defined benefit obligations is as follows:

	UK £m	Company £m	Other £m	Total £m

The cumulative amount of actuarial gains and losses recognised in the Statement of Comprehensive Income since 1 January 2004 is a £177.7m loss (2019: £129.3m loss). The Directors are unable to determine how much of the pension scheme deficit recognised on transition to IFRS and taken directly to equity of £51.9m is attributable to actuarial gains and losses since inception of those pension schemes. Consequently the Directors are unable to determine the amount of actuarial gains and losses that would have been recognised in the Statement of Comprehensive Income before 1 January 2004.

35 Leases

Group as a lessee

The Group has lease contracts for various items of property, vehicles, plant and other equipment. Lease terms are negotiated on an individual basis, contain a wide range of different terms and conditions and may include extension and termination options. These options are negotiated by management to provide flexibility in managing the leased-asset portfolio and align with the Group's business needs. Management exercises judgement in determining whether these extension and termination options are reasonably certain to be exercised.

The Group's obligations under its leases are secured by the lessor's title to the leased assets.

(a) Amounts recognised in the Balance Sheet

Set out below is the net book value of right-of-use assets and additions during the year (included in property, plant and equipment – note 15):

	2020				2019			
	Land and buildings £m	Public service vehicles £m	Plant and equipment, fixtures and fittings £m	Total £m	Land and buildings £m	Public service vehicles £m	Plant and equipment, fixtures and fittings £m	Total £m
Right-of-use assets								
Additions	29.6	6.4	0.2	36.2	30.1	74.1	0.1	104.3
Depreciation charge	(30.6)	(46.1)	(0.6)	(77.3)	(28.7)	(41.3)	(0.7)	(70.7)
Net book value at 31 December	107.0	213.3	1.1	321.4	118.2	265.5	1.5	385.2

Set out below are the carrying amounts of lease liabilities (included in borrowings – note 29) at 31 December 2020:

	2020 £m	2019 ¹ £m
Lease liabilities		
Current	86.5	94.2
Non-current	239.7	295.8
	326.2	390.0

¹ Lease liabilities has been represented to reclassify IFRIC 12 liabilities of £17.5m from borrowings to trade and other payables, see note 2 for further information

The maturity analysis of lease liabilities is presented in note 29.

(b) Amounts recognised in the Income Statement

	2020 £m	2019 £m
Depreciation expense on right-of-use assets (note 6)	77.3	70.7
Interest on lease liabilities (note 10)	12.6	12.8
Interest income on sub-leases (note 10)	(0.6)	(0.2)
Expenses relating to short-term leases (note 6)	7.9	10.3
Expenses relating to leases of low-value assets (note 6)	5.2	7.6
Covid-19-related rent concessions (note 6)	(0.7)	-
Income from sub-leasing right-of-use assets (included in other revenue)	(1.6)	(1.6)
Gains and losses arising from sale and leaseback transactions	-	(6.8)

It is not expected that commitments for short-term leases will materially differ from those in place at 31 December 2020.

(c) Amounts recognised in the Cash Flow Statement

	2020 £m	2019 £m	Included within
Payment of principal and interest	(97.7)	(91.1)	Cash flows from financing activities
Payments for short-term and low-value leases	(13.1)	(17.9)	Cash flows from operations
Total cash outflow for leases	(110.8)	(109.0)	

35 Leases continued

(d) Extension and termination options

Some property and vehicle leases contain extension or termination options exercisable by the Group before the end of the non-cancellable contract period. Where practicable, the Group seeks to include extension or termination options in new leases to provide operational flexibility. The extension and termination options held are exercisable only by the Group and not by the lessors. The Group assesses at lease commencement date whether it is reasonably certain to exercise the extension or termination options and re-assesses these assumptions when there is a significant event or significant change in circumstances within its control. Where the Group determines it is reasonably certain that a termination option will be exercised, any termination penalty is included in the lease liability.

The Group has estimated that the potential future lease payments, should it exercise the extension or termination options, would result in an immaterial change in the lease liability.

(e) Variable lease payments

The Group does not have variable lease payments that are not included in the lease liability.

(f) Residual value guarantees

The Group has a small number of leased vehicles with residual value guarantees. At the lease commencement date the amounts expected to be payable have been included in the lease liability.

(g) Future lease commitments

At the year end the Group had no commitments relating to leases not yet commenced (2019: £7.7m).

Group as a lessor

The Group entered into finance leasing arrangements as a lessor for certain vehicles to its customers. During 2020, the Group recognised interest income on lease receivables of £0.6m (2019: £0.2m).

The following table sets out a maturity analysis of lease receivables, showing the undiscounted lease payments to be received after the reporting date:

	2020 £m	2019 £m
Net investment in the lease		
Within one year	4.7	1.6
After one year but not more than five years	11.0	3.5
More than five years	0.3	0.4
Total undiscounted lease receivable	16.0	5.5
Unearned finance income	(1.1)	(0.5)
Finance lease receivable	14.9	5.0

The maturity analysis of the discounted lease payments are as follows:

	2020 £m	2019 £m
Net investment in the lease		
Current	4.3	1.4
Non-current	10.6	3.6
	14.9	5.0

The Group also sub-leases some of its property and public service vehicles. The Group has classified these sub-leases as operating leases, because they do not transfer substantially all of the risks and rewards incidental to the right-of-use assets. The following table sets out a maturity analysis of lease payments, showing the undiscounted lease payments to be received after the reporting date.

	2020 £m	2019 £m
Operating lease receipts		
Within one year	1.3	2.1
After one year but not more than five years	1.8	5.3
More than five years	-	0.1
	3.1	7.5

36 Commitments and contingencies

(a) Capital commitments

	2020 £m	2019 £m
Contracted	97.1	141.7

The Group is committed to vehicle purchases and various land and buildings improvements.

(b) Contingent liabilities

Guarantees

The Group has guaranteed credit facilities totalling £7.3m (2019: £13.4m) of certain joint ventures.

Bonds and letters of credit

In the ordinary course of business, the Group is required to issue counter-indemnities in support of its operations. As at 31 December 2020, the Group had performance bonds in respect of businesses in the US of £165.3m (2019: £157.9m), in Spain of £106.7m (2019: £83.6m), in Germany of £32.0m (2019: £26.0m) and in the Middle East of £6.0m (2019: £6.2m). Letters of credit have been issued to support insurance retentions of £117.2m (2019: £112.4m).

Covid-19 claims

As explained in note 5 the Group has made a provision for employee compensation claims as a consequence of the Covid-19 pandemic. In addition the Group could be exposed to potential claims from the general public as a consequence of the pandemic. However, as yet no general public claims have been received and therefore it is not possible to reliably estimate what, if any, liability could arise.

Tax

Tax authorities in the markets in which we operate (UK, Spain, Germany, USA, Canada and Morocco) carry out tax audits from time to time. As was detailed in note 11(d) Tax provisions, there are a number of tax uncertainties such as the deductibility of interest expense in the UK and Spain and tax audits in Spain. The Directors are satisfied that, based on current knowledge, adequate tax provisions are held to cover any tax uncertainties. The Group had tax provisions at 31 December 2020 of £2.4m (2019: £10.8m). There are no material contingent liabilities relating to tax.

A number of Spanish companies have leased properties from companies related to the Cosmen family. Jorge Cosmen is a Non-Executive Director of the Group and was appointed as Deputy Chairman in October 2008. These leases were in place before the Group's acquisition of ALSA and are at appropriate market rates.

The details of the post-employment benefit plans operated for the benefit of employees of the Group are disclosed in note 34.

37 Related party transactions continued

Compensation of key management personnel of the Group

	2020 £m	2019 £m
Total compensation paid to key management personnel (note 8)	0.8	6.9

38 Service concession arrangements

The following table sets out the nature and extent of the Group's service concession arrangements:

Concession	Description of the arrangement	Concession period	Concession commencement	Nature of infrastructure	Classification under IFRIC 12
German Rail	The Group operates two train services in Germany.	15 years	2015 – 2020	Rolling stock and tracks used in the operation of the service are provided by the delegating authority.	No financial or intangible asset is recognised for construction as the infrastructure is provided to the Group.
Moroccan urban bus	The Group has two contracts with the Moroccan authority for the operation of public transport bus services.	15 years	September 2019	Public service vehicles used in the operation are provided by the Group, some of which are subject to lease type arrangements.	Intangible asset
		Up to 15 years	November 2019	Initially, public service vehicles used in operation are provided by the public authority. Replacement public service vehicles will be provided by the Group and public authority in future years.	Financial asset
Spanish Urban Bus	The Group has a contract with the Spanish government to operate urban commuter coach services in Spain.	10 years	August 2019	Public service vehicles used in the operation are provided by the Group.	Financial asset

During the year no revenue or profit was recognised in exchanging construction services for financial or intangible assets.

Remove: fair value of foreign exchange forward contracts	6.8	20.8	–	(7.2)	–	20.4
Net debt³	(1,165.2)	37.8	(39.0)	20.3	(77.9)	(1,224.0)

¹ Net of arrangement fees totalling £2.7m on bank and other loans

² Opening balances were restated for the adoption of IFRS 16 'Leases'. The closing balance is inclusive of finance lease receivables which are reported separately from borrowings on the face of the Group's Balance Sheet

³ Excludes accrued interest on long-term borrowings

⁴ Lease liabilities has been represented to reclassify IFRIC 12 liabilities of £17.5m from borrowings to trade and other payables, see note 2 for further information

(c) Reconciliation of net cash flow to movement in net debt

	2020 £m	2019 ^{1,2} £m
Increase in cash and cash equivalents in the year	36.5	365.1
Cash (outflow)/inflow from movement in other debt receivables	(1.2)	0.3
Cash inflow/(outflow) from movement in debt and leases liabilities	291.5	(366.6)
Change in net debt resulting from cash flows	326.8	(1.2)
Change in net debt resulting from non-cash movements	(44.4)	(57.6)
Movement in net debt in the year	282.4	(58.8)
Opening net debt ¹	(1,224.0)	(1,165.2)
Net debt	(941.6)	(1,224.0)

¹ Opening balances in 2019 were restated for the adoption of IFRS 16 'Leases'

² Closing balances in 2019 have been represented to correct the presentation of IFRIC 12 financial liabilities, see note 2 for further information

40 Subsidiary undertakings and other significant holdings
